Indicators

Nutrients

Total Nitrogen - Discrete

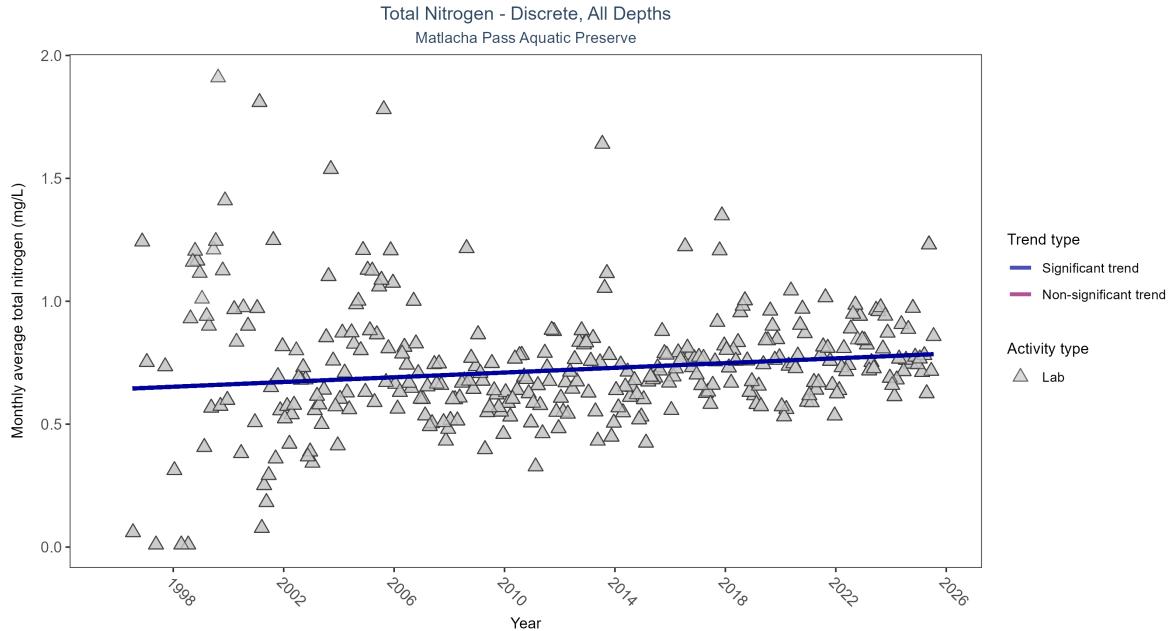

Figure 1: Scatter plot of monthly average total nitrogen over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only nitrogen values obtained from laboratory analyses (triangles) are included in the plot.

Table 1: Seasonal Kendall-Tau Results for - Total Nitrogen

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Lab	Significantly increasing trend	2076	30	1996 - 2025	0.705	0.14693	0.64261	0.00481	2e-04

Monthly average total nitrogen increased by less than 0.01 mg/L per year.

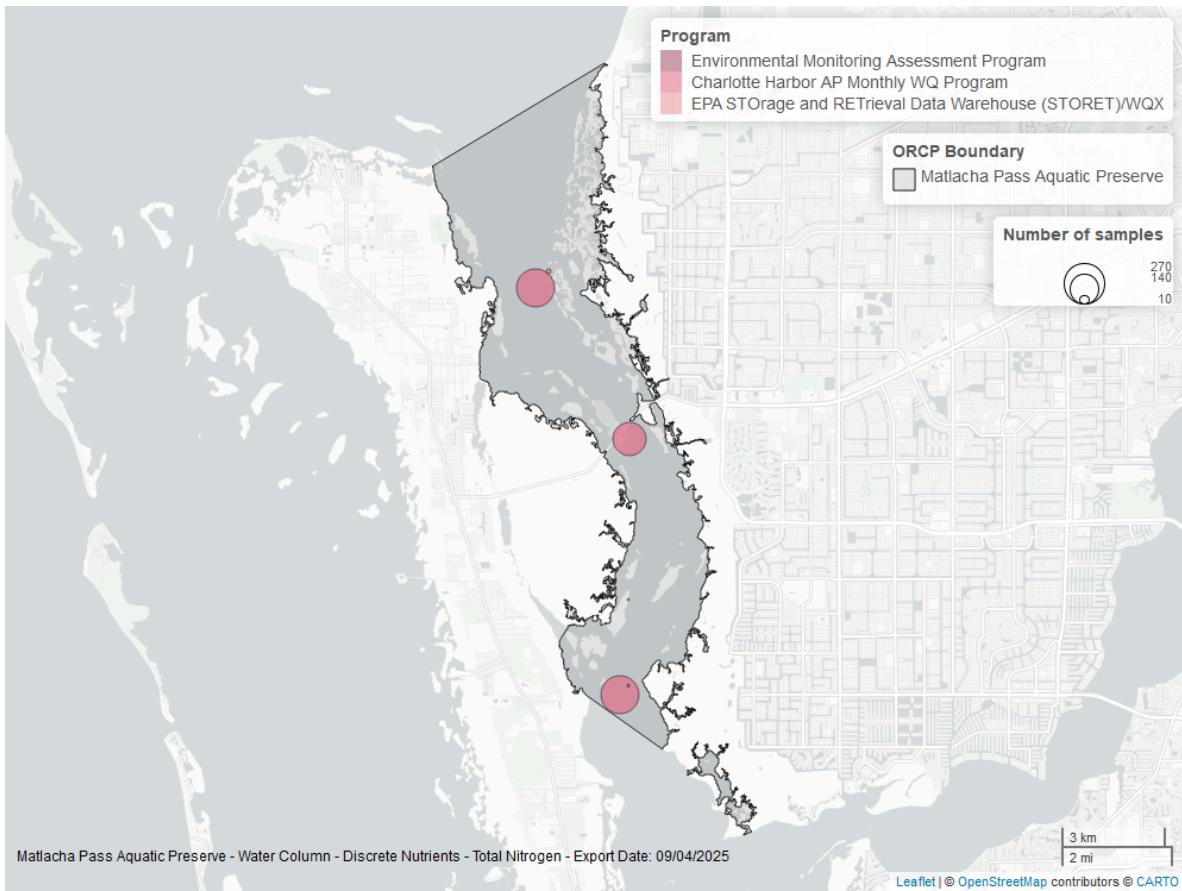

Figure 2: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Total Phosphorus - Discrete

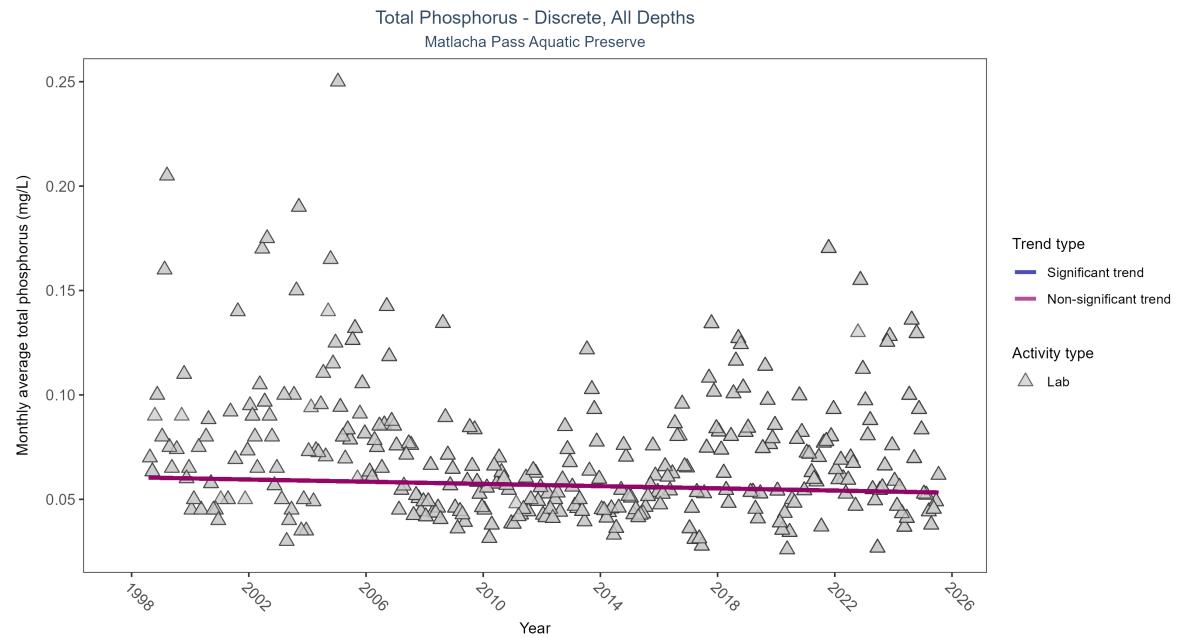

Figure 3: Scatter plot of monthly average total phosphorus over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only phosphorus values obtained from laboratory analyses (triangles) are included in the plot.

Table 2: Seasonal Kendall-Tau Results for - Total Phosphorus

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Lab	No significant trend	1921	28	1998 - 2025	0.06	-0.05582	0.06055	-0.00026	0.1821

Total phosphorus showed no detectable trend between 1998 and 2025.

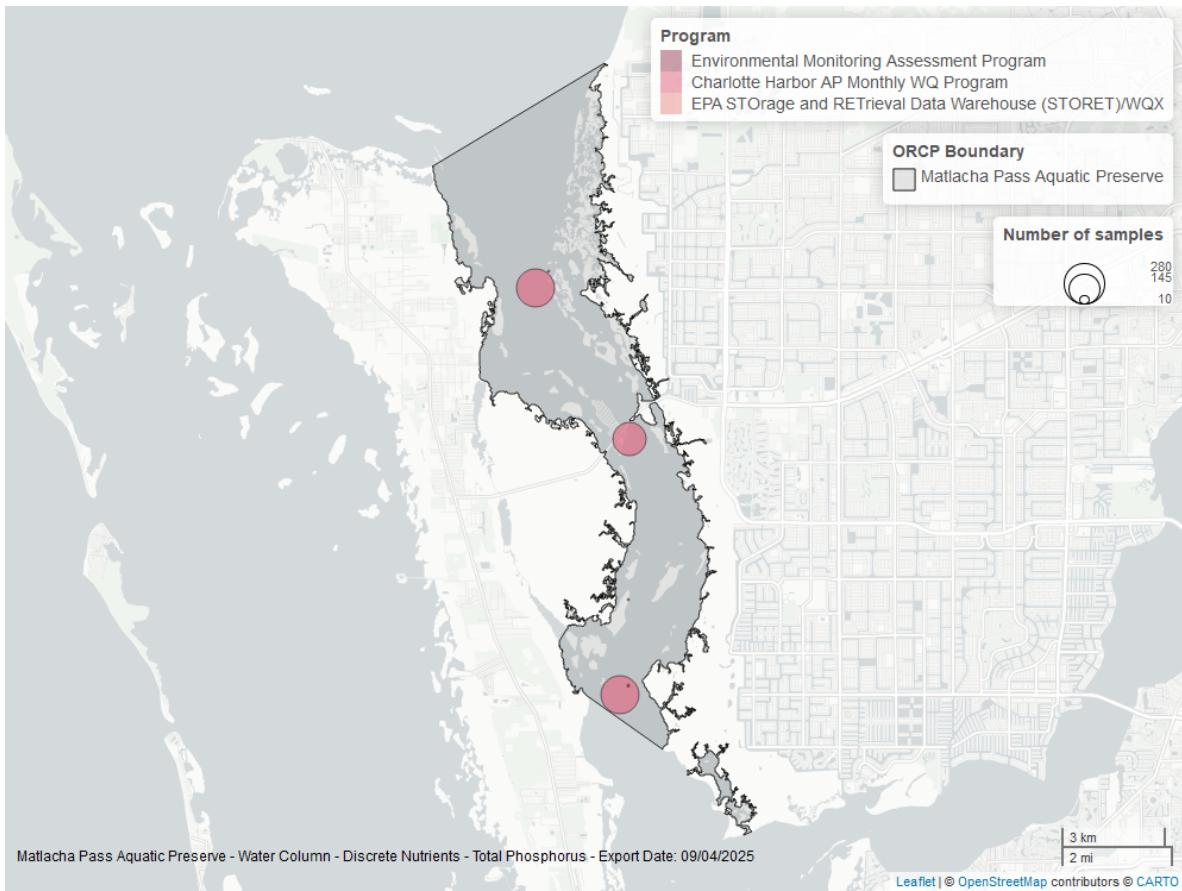

Figure 4: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Water Quality

Dissolved Oxygen - Discrete

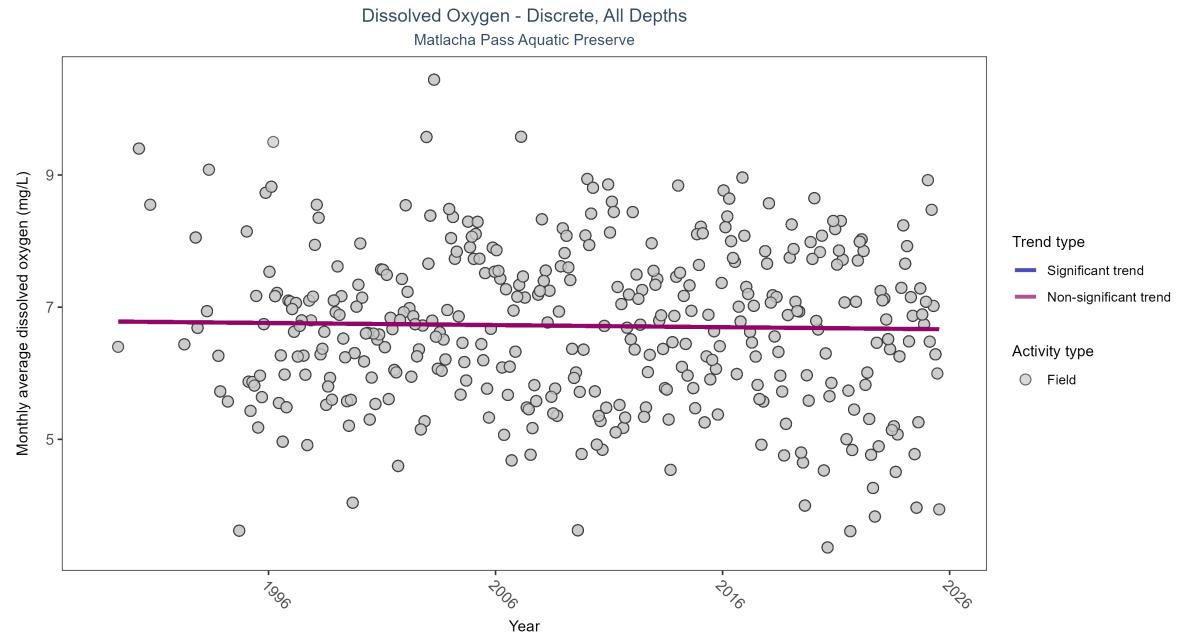

Figure 5: Scatter plot of monthly average dissolved oxygen over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only dissolved oxygen values measured in the field (circles) are included in the plot.

Table 3: Seasonal Kendall-Tau Results for - Dissolved Oxygen

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Field	No significant trend	10837	36	1989 - 2025	6.6	-0.02711	6.78296	-0.00319	0.4646

Dissolved oxygen showed no detectable trend between 1989 and 2025.

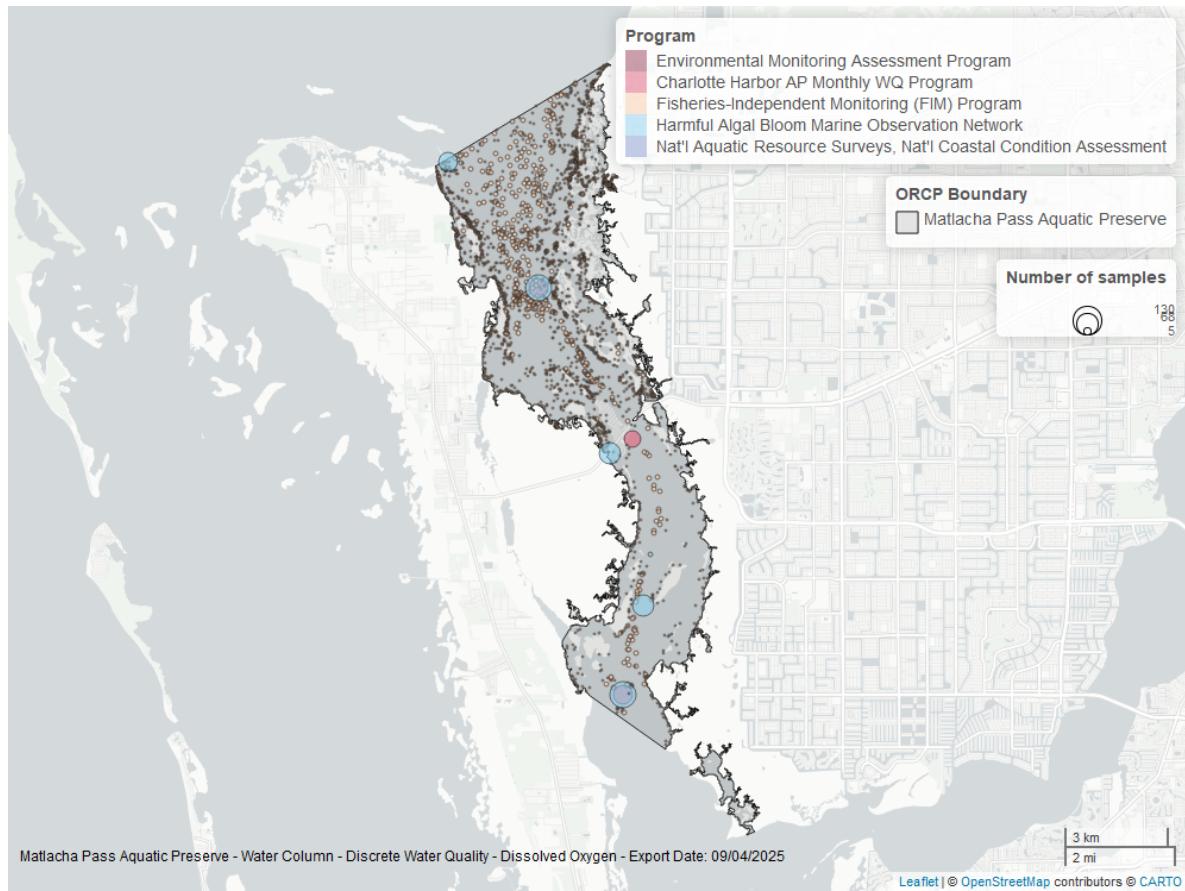

Figure 6: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Dissolved Oxygen - Continuous

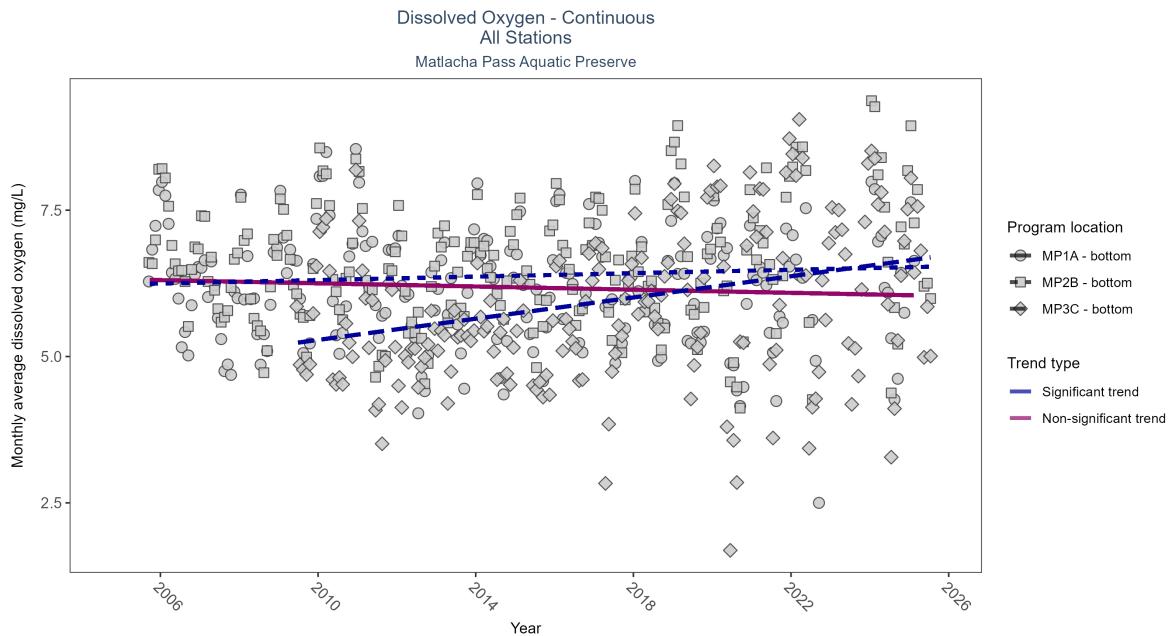

Figure 7: Scatter plot of monthly average dissolved oxygen over time at continuously monitored program locations. Each location is analyzed separately, with significant (blue) or non-significant (magenta) trend lines shown for time series that included five or more years of observations.

Table 4: Seasonal Kendall-Tau Results - Dissolved Oxygen

Program Location	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
MP1A	No significant trend	559697	20	2005 - 2025	6.3	-0.08	6.32	-0.01	0.1322
MP2B	Significantly increasing trend	582130	20	2005 - 2025	6.7	0.09	6.23	0.01	0.0495
MP3C	Significantly increasing trend	503147	17	2009 - 2025	5.9	0.30	5.19	0.09	0

At two program locations, monthly average dissolved oxygen increased by 0.01 mg/L per year at one site and by 0.09 mg/L per year at the other. No detectable change in monthly average dissolved oxygen was observed at one location.

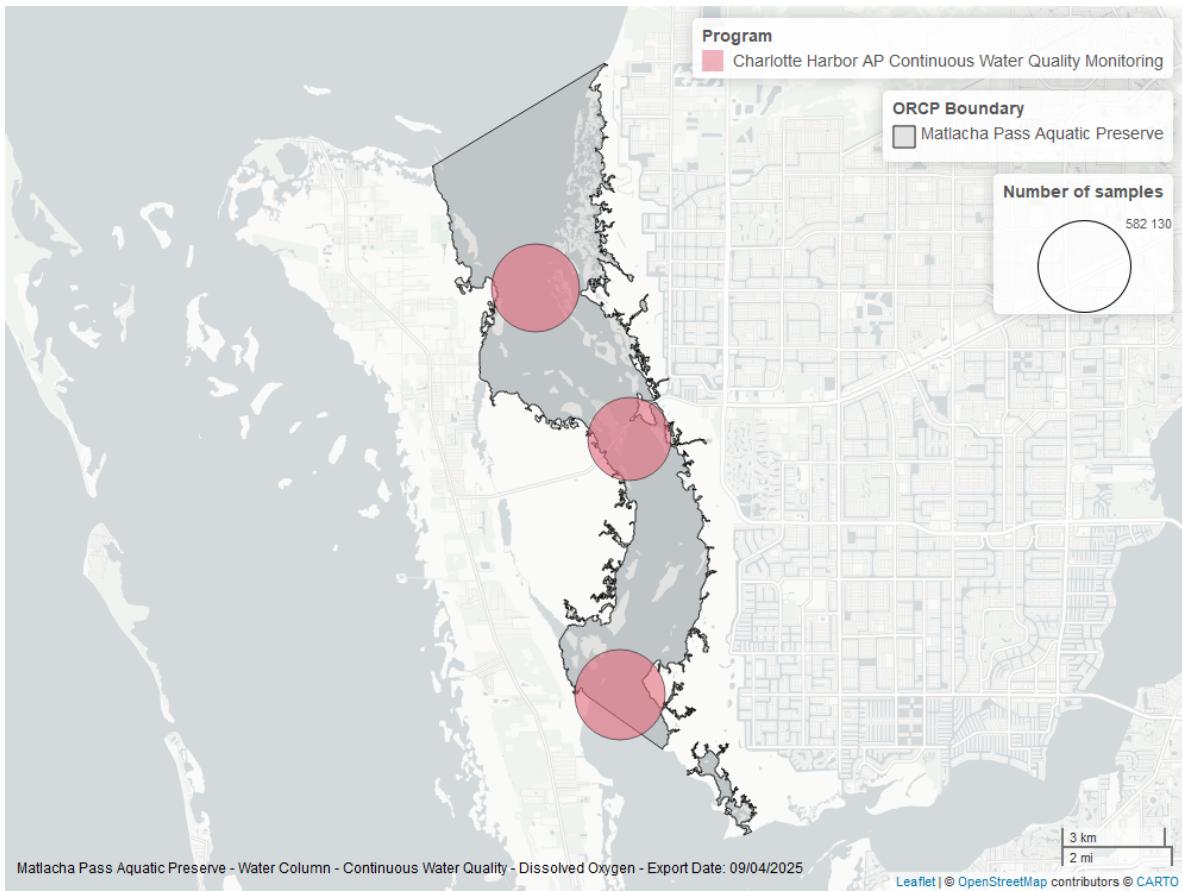

Figure 8: Map showing location of dissolved oxygen continuous water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Dissolved Oxygen Saturation - Discrete

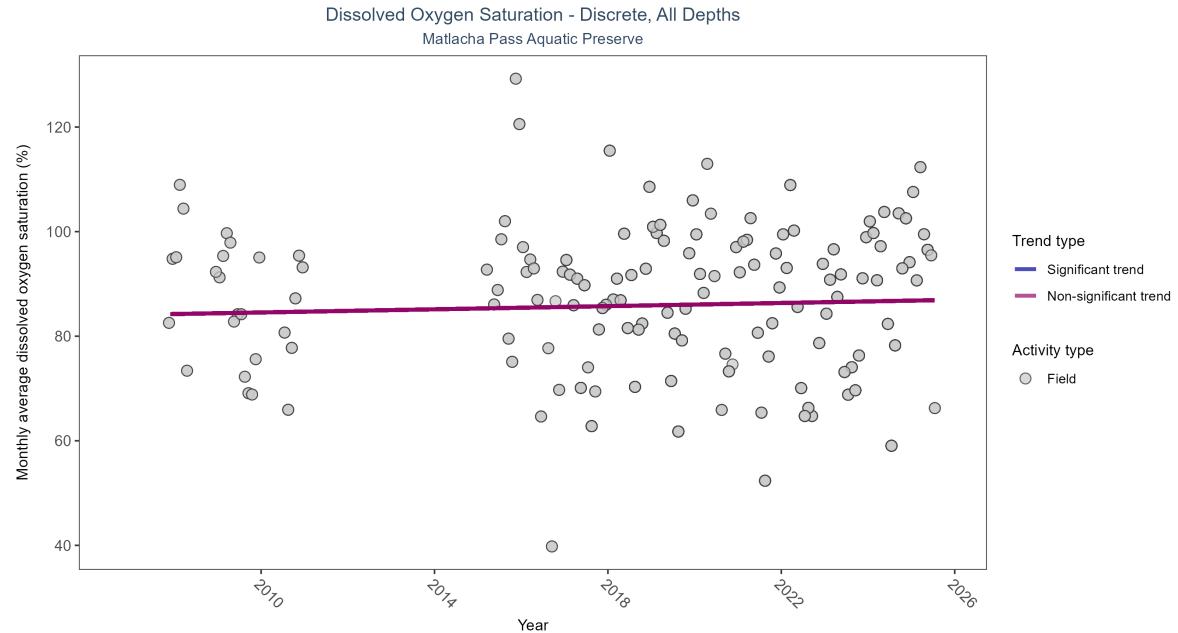

Figure 9: Scatter plot of monthly average dissolved oxygen saturation over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only dissolved oxygen saturation values measured in the field (circles) are included in the plot.

Table 5: Seasonal Kendall-Tau Results for - Dissolved Oxygen Saturation

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Field	No significant trend	1341	15	2007 - 2025	90.12857	0.05434	84.08785	0.15078	0.3647

Dissolved oxygen saturation showed no detectable trend between 2007 and 2025.

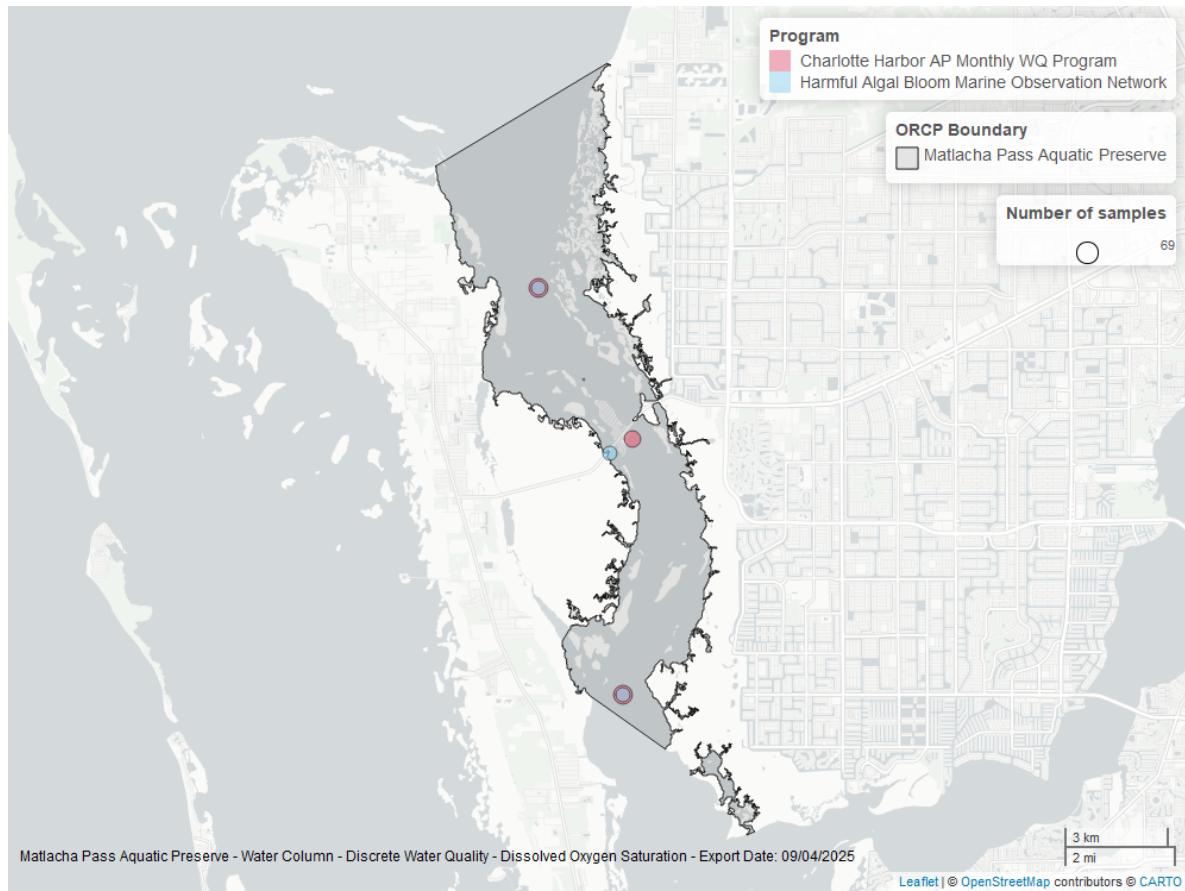

Figure 10: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Dissolved Oxygen Saturation - Continuous

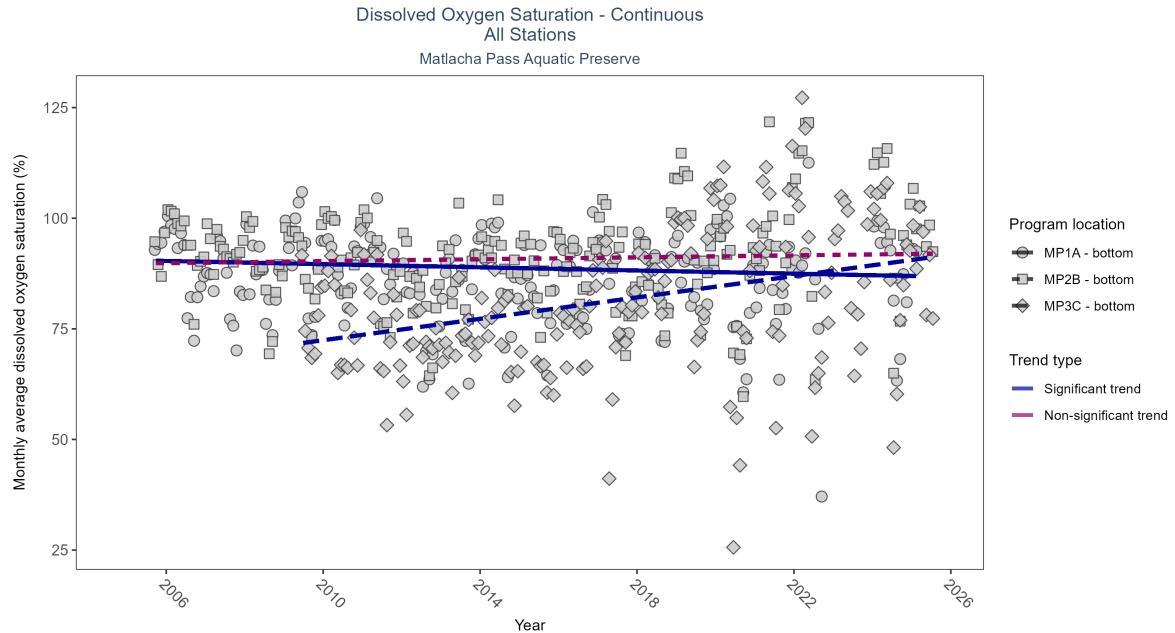

Figure 11: Scatter plot of monthly average dissolved oxygen saturation over time at continuously monitored program locations. Each location is analyzed separately, with significant (blue) or non-significant (magenta) trend lines shown for time series that included five or more years of observations.

Table 6: Seasonal Kendall-Tau Results - Dissolved Oxygen Saturation

Program Location	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
MP1A	Significantly decreasing trend	557055	20	2005 - 2025	88.1	-0.13	90.51	-0.18	0.0114
MP2B	No significant trend	582431	20	2005 - 2025	91.6	0.05	89.74	0.11	0.3131
MP3C	Significantly increasing trend	504488	17	2009 - 2025	81.8	0.29	71.22	1.21	0

At one program location, monthly average dissolved oxygen saturation increased by 1.21% per year. At one program location, monthly average dissolved oxygen saturation decreased by 0.18% per year. No detectable change in monthly average dissolved oxygen saturation was observed at one location.

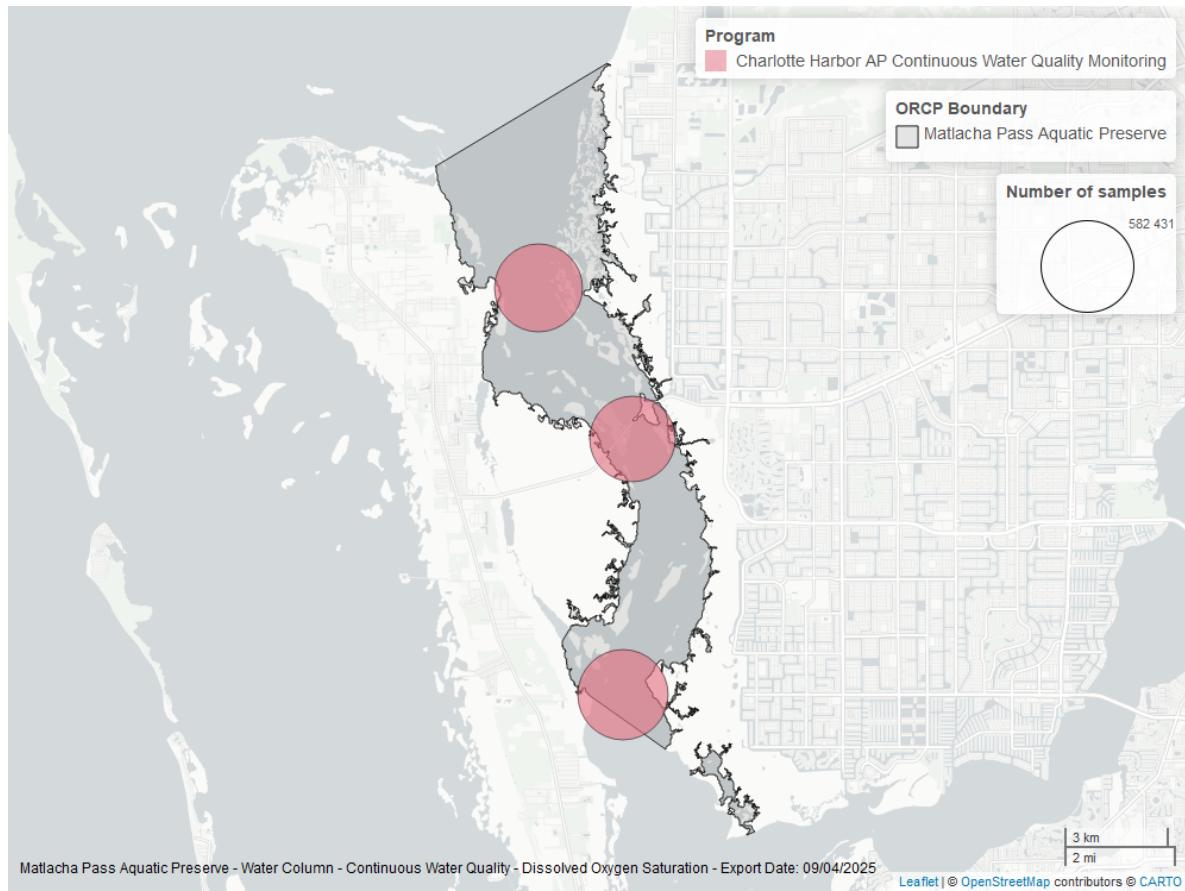

Figure 12: Map showing location of dissolved oxygen saturation continuous water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Salinity - Discrete

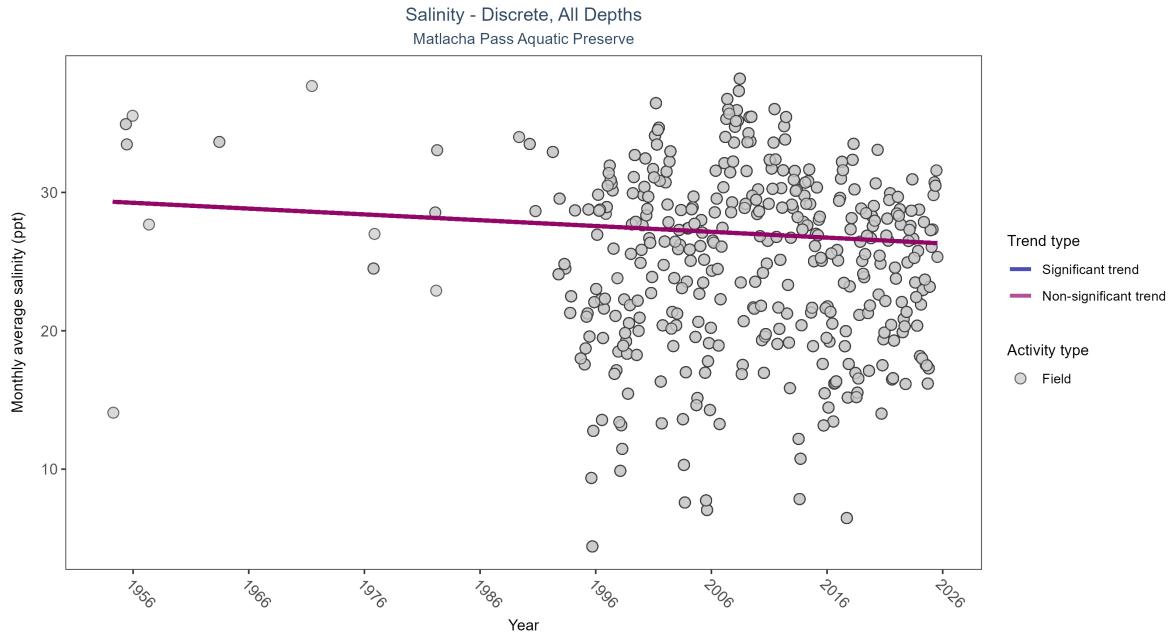

Figure 13: Scatter plot of monthly average salinity over time. If the time series included ten or more years of discrete observations, significant (blue) or non-significant (magenta) trend lines are also shown. Discrete salinity values derived from grab samples analyzed in the field (circles) or the laboratory (triangles) are both included in the plot.

Table 7: Seasonal Kendall-Tau Results for - Salinity

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
All	No significant trend	11101	43	1954 - 2025	25.9	-0.05912	29.3334	-0.04193	0.0913

Salinity showed no detectable trend between 1954 and 2025.

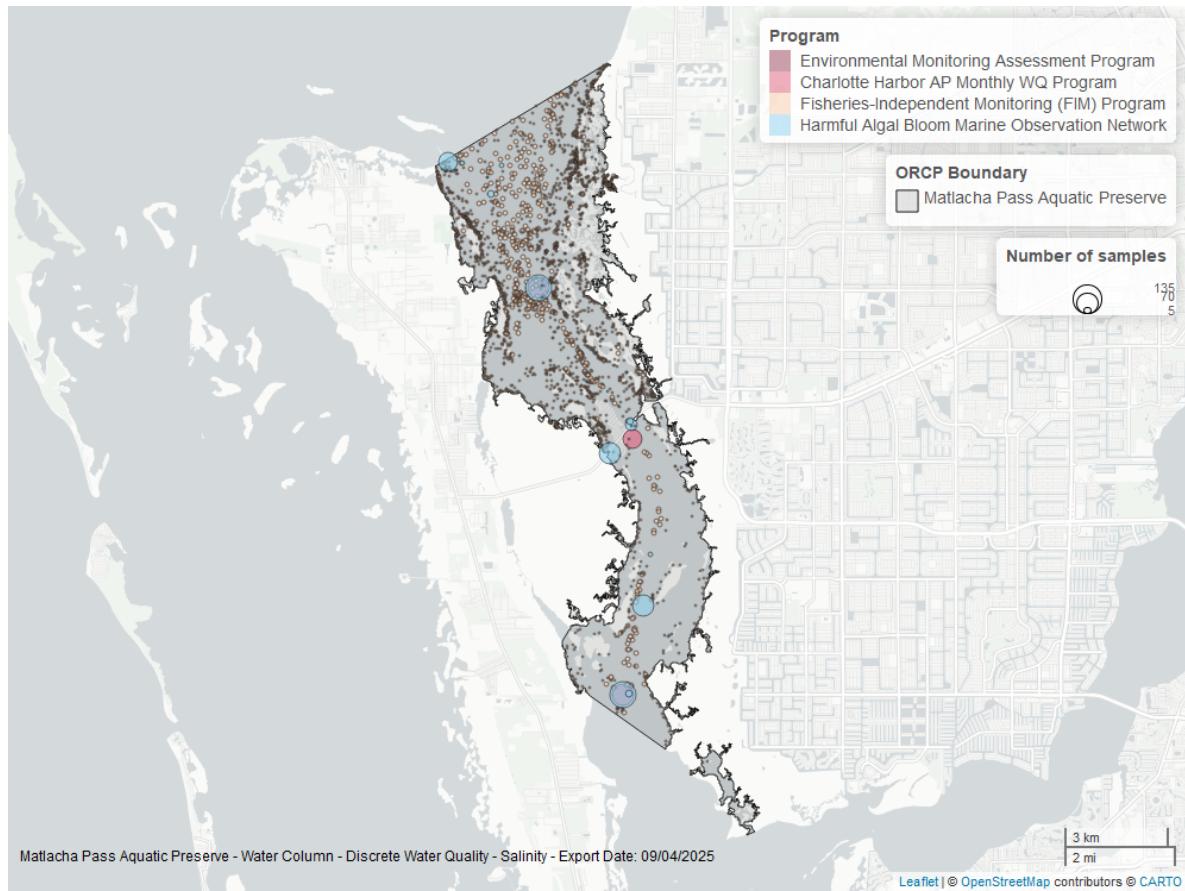

Figure 14: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Salinity - Continuous

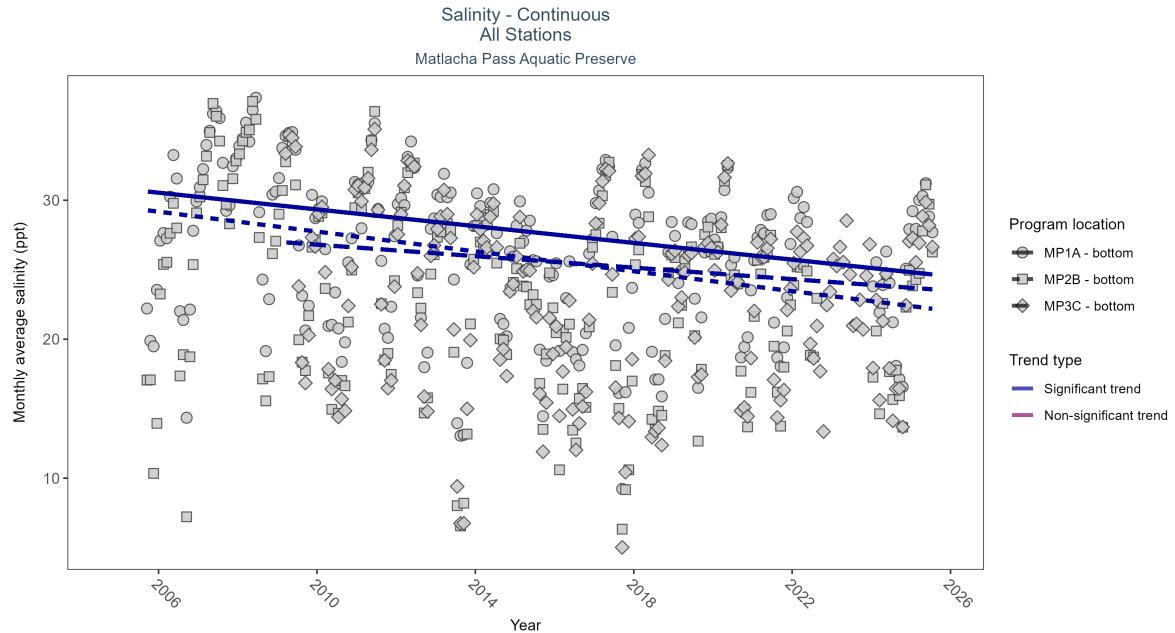

Figure 15: Scatter plot of monthly average salinity over time at continuously monitored program locations. Each location is analyzed separately, with significant (blue) or non-significant (magenta) trend lines shown for time series that included five or more years of observations.

Table 8: Seasonal Kendall-Tau Results - Salinity

Program Location	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
MP1A	Significantly decreasing trend	591536	20	2005 - 2025	27.1	-0.33	30.85	-0.30	0
MP2B	Significantly decreasing trend	608901	20	2005 - 2025	24.4	-0.32	29.53	-0.36	0
MP3C	Significantly decreasing trend	536089	17	2009 - 2025	23.8	-0.17	27.01	-0.21	0.0016

At three program locations, monthly average salinity decreased between 0.21 and 0.36 ppt per year.

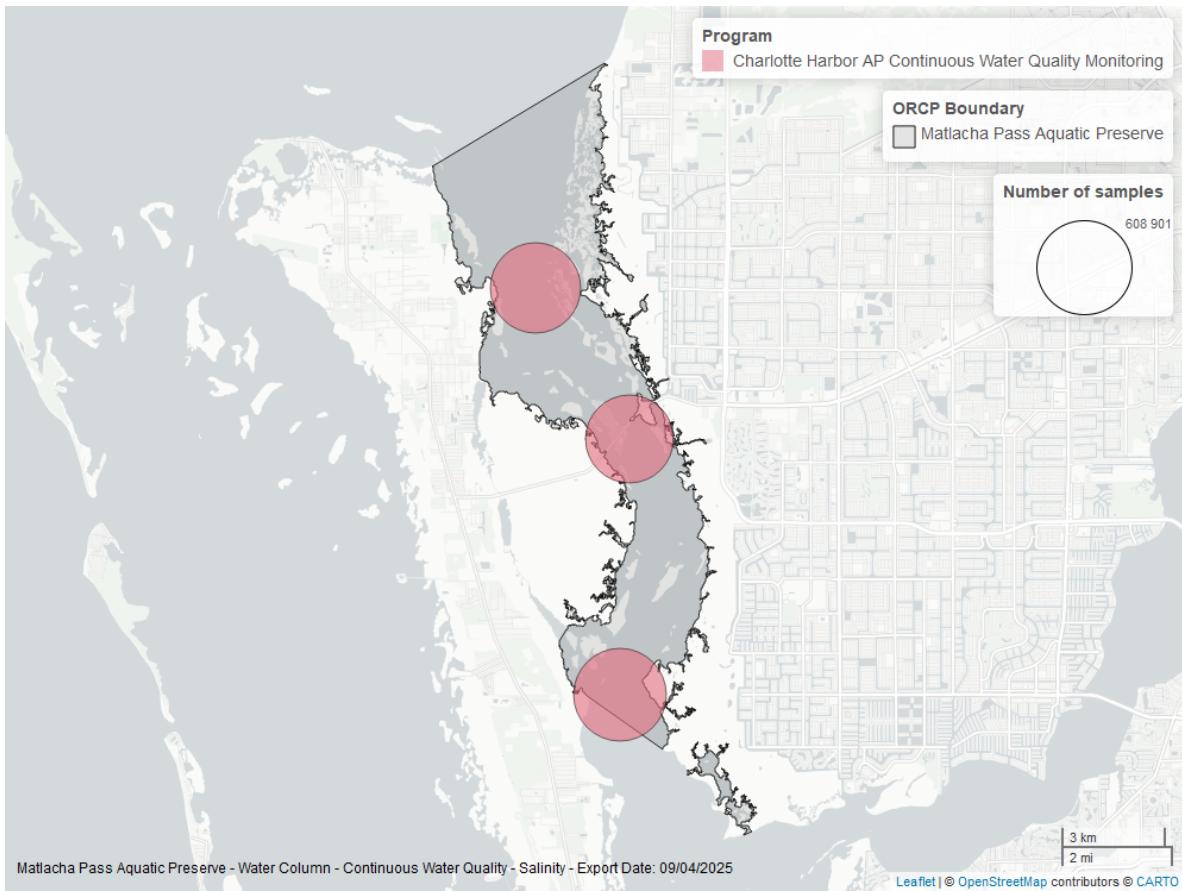

Figure 16: Map showing location of salinity continuous water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Water Temperature - Discrete

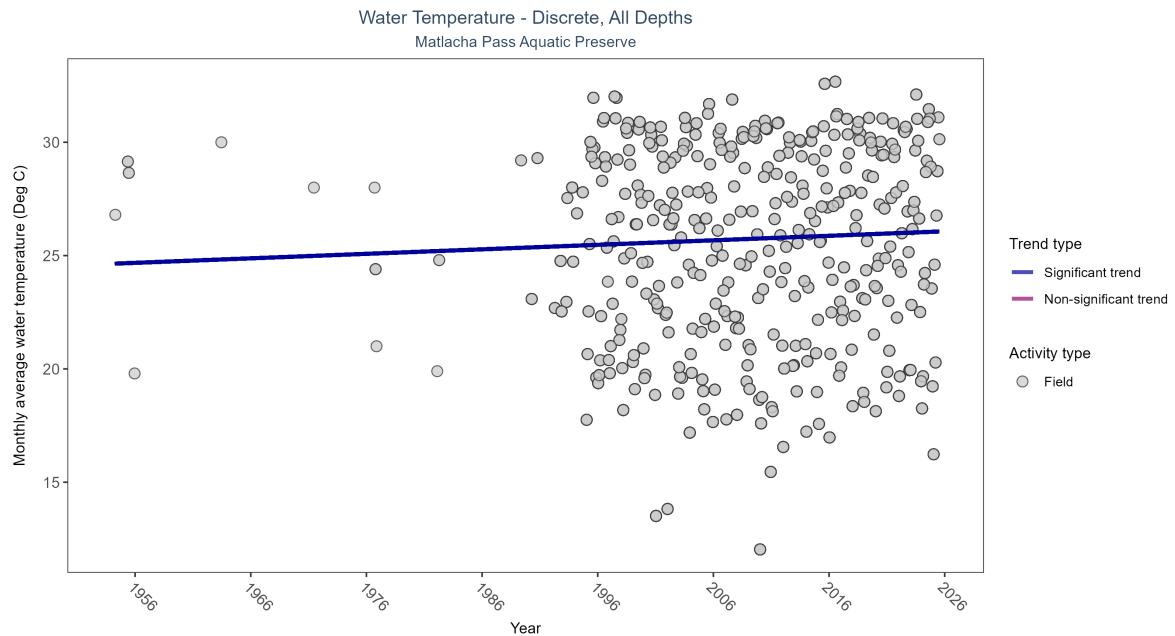

Figure 17: Scatter plot of monthly average water temperature over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only water temperature measurements taken in the field (circles) are included in the plot.

Table 9: Seasonal Kendall-Tau Results for - Water Temperature

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Field	Significantly increasing trend	11054	42	1954 - 2025	26.2	0.09871	24.63986	0.01989	0.0044

Monthly average water temperature increased by 0.02°C per year.

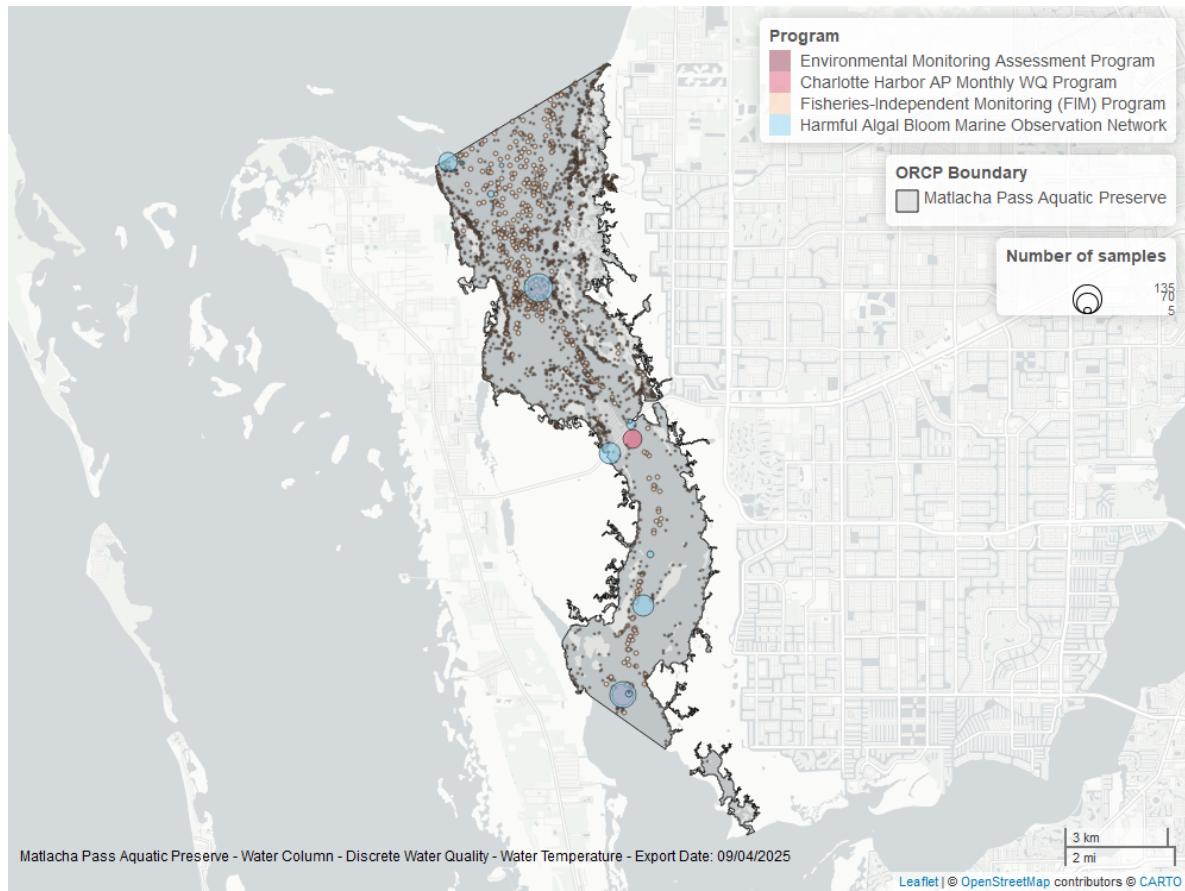

Figure 18: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Water Temperature - Continuous

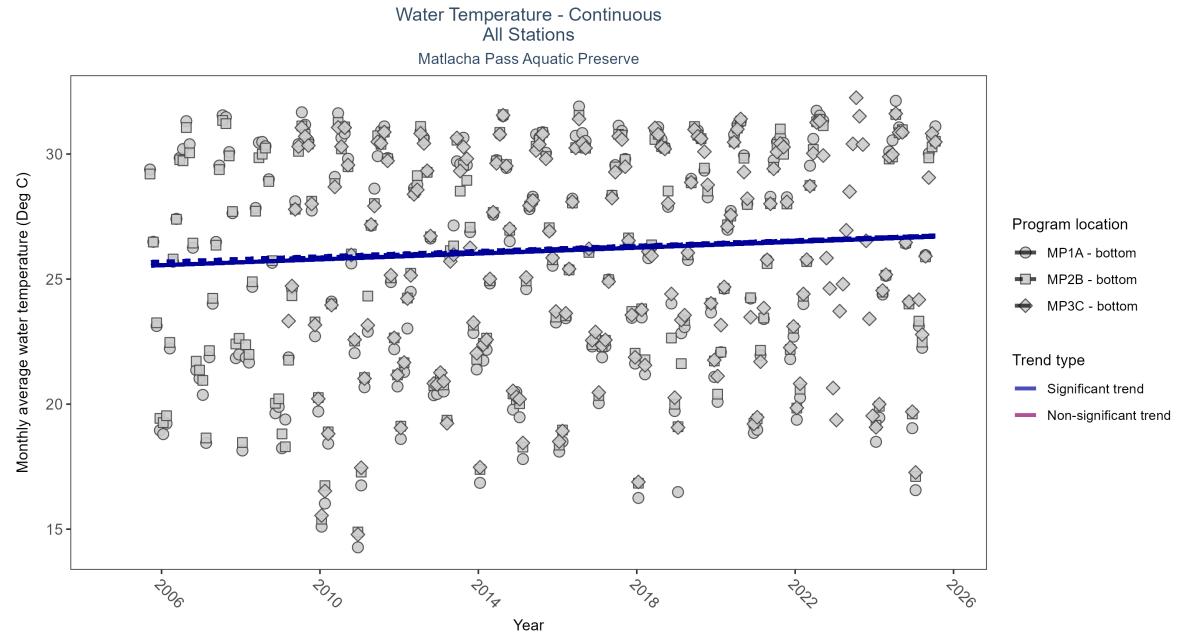

Figure 19: Scatter plot of monthly average water temperature over time at continuously monitored program locations. Each location is analyzed separately, with significant (blue) or non-significant (magenta) trend lines shown for time series that included five or more years of observations.

Table 10: Seasonal Kendall-Tau Results - Water Temperature

Program Location	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
MP1A	Significantly increasing trend	627420	20	2005 - 2025	26.4	0.25	25.50	0.06	0
MP2B	Significantly increasing trend	622886	20	2005 - 2025	26.2	0.20	25.64	0.05	0
MP3C	Significantly increasing trend	541428	17	2009 - 2025	26.6	0.19	25.80	0.06	2e-04

At three program locations, monthly average water temperature increased between 0.05 and 0.06°C per year.

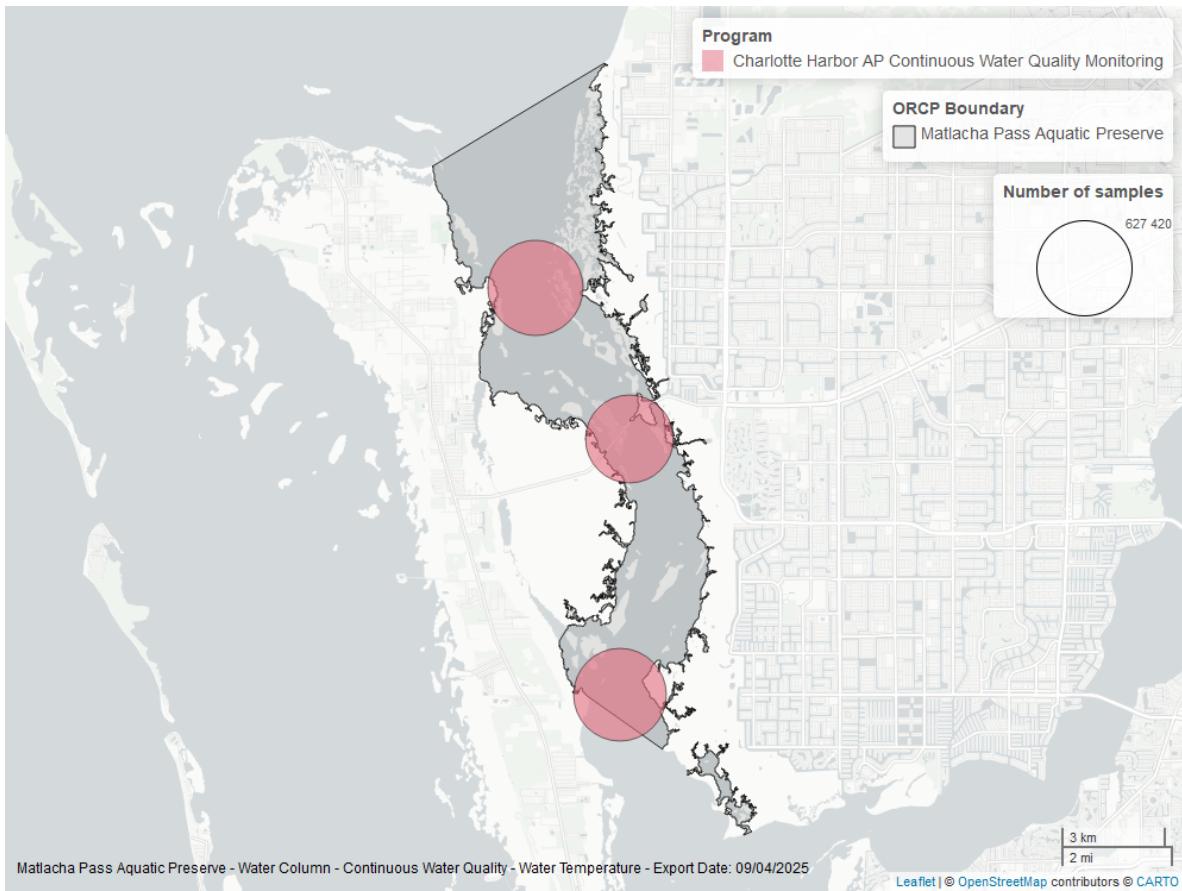

Figure 20: Map showing location of water temperature continuous water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

pH - Discrete

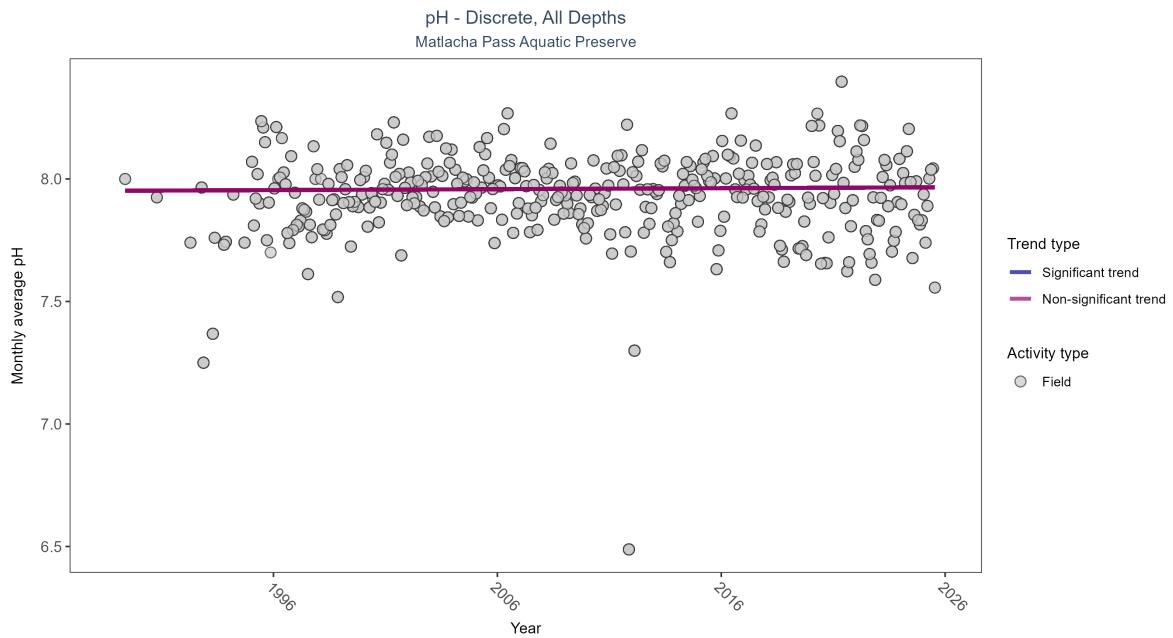

Figure 21: Scatter plot of monthly average pH over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only pH values measured in the field (circles) are included in the plot.

Table 11: Seasonal Kendall-Tau Results for - pH

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Field	No significant trend	10175	36	1989 - 2025	7.93	0.01021	7.95188	0.00038	0.6587

pH showed no detectable trend between 1989 and 2025.

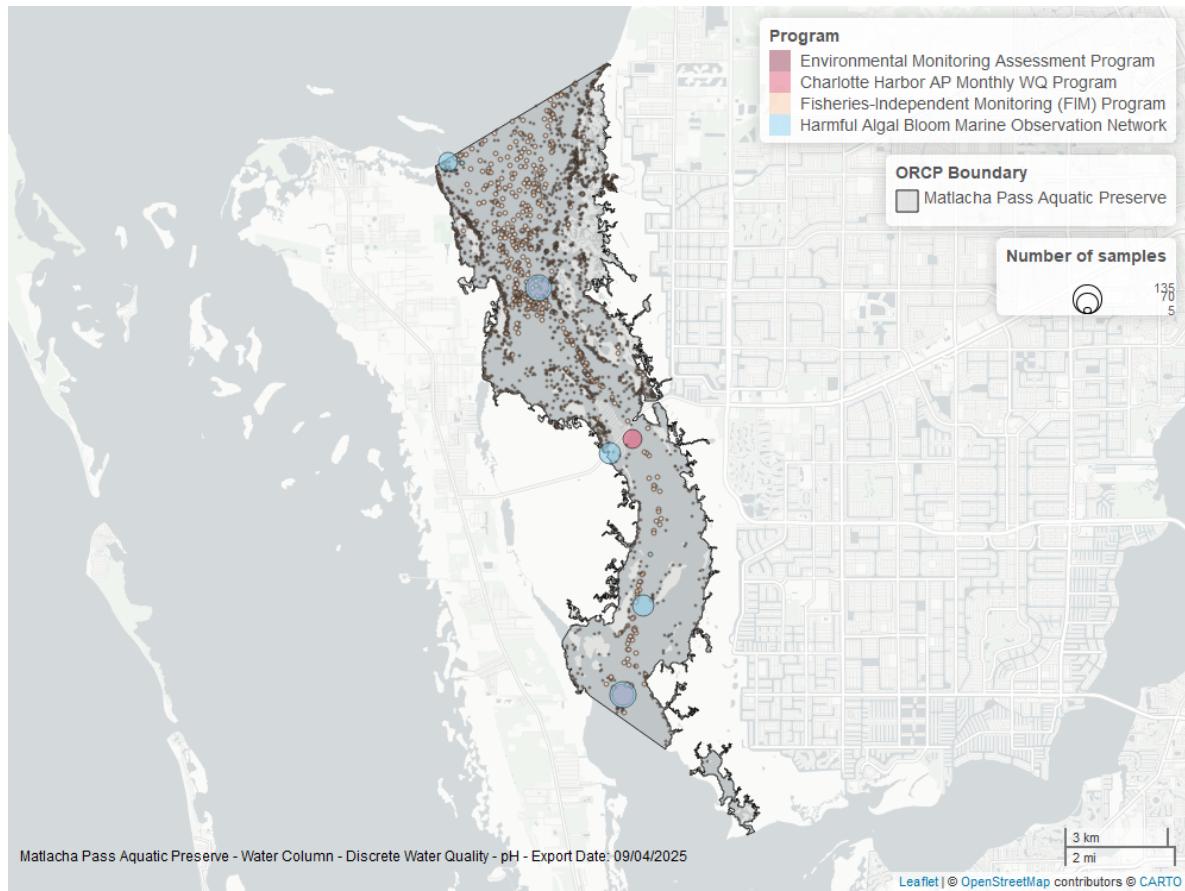

Figure 22: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

pH - Continuous

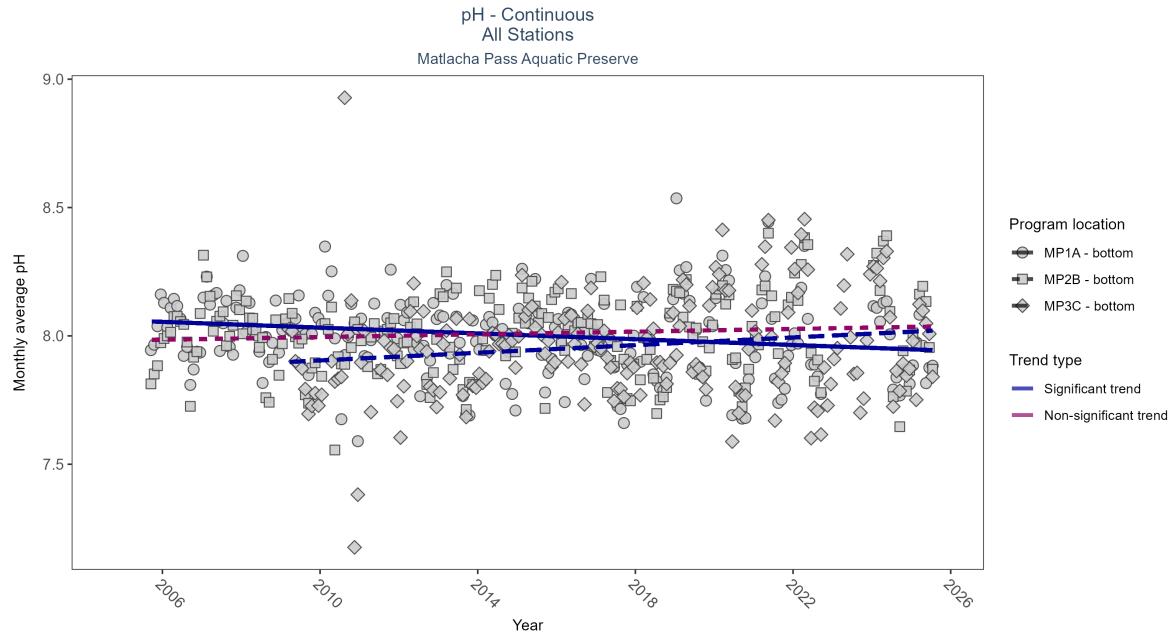

Figure 23: Scatter plot of monthly average pH over time at continuously monitored program locations. Each location is analyzed separately, with significant (blue) or non-significant (magenta) trend lines shown for time series that included five or more years of observations.

Table 12: Seasonal Kendall-Tau Results - pH

Program Location	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
MP1A	Significantly decreasing trend	539976	20	2005 - 2025	8	-0.19	8.06	-0.01	2e-04
MP2B	No significant trend	556906	20	2005 - 2025	8	0.06	7.98	0.00	0.2138
MP3C	Significantly increasing trend	479444	17	2009 - 2025	8	0.15	7.90	0.01	0.0052

At one program location, monthly average pH increased by 0.01 pH units per year. At one program location, monthly average pH decreased by 0.01 pH units per year. No detectable change in monthly average pH was observed at one location.

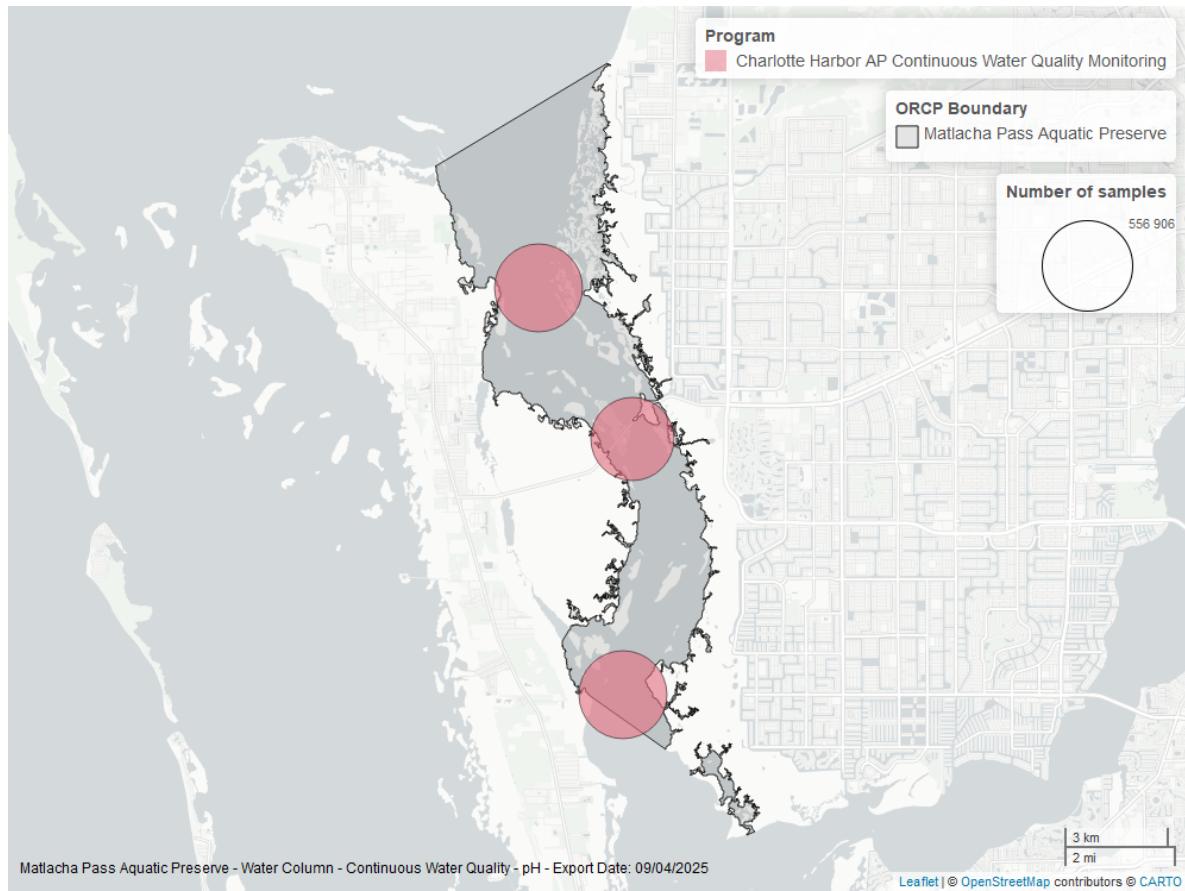

Figure 24: Map showing location of ph continuous water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Water Clarity

Turbidity - Discrete

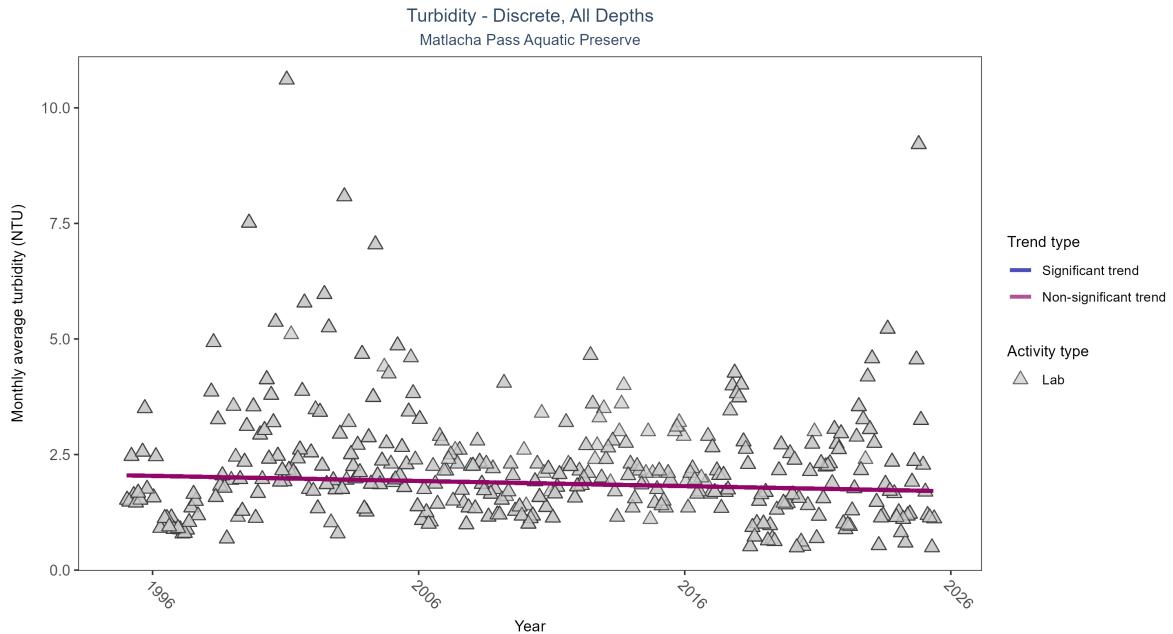

Figure 25: Scatter plot of monthly average turbidity over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only turbidity values measured in the laboratory (triangles) are included in the plot.

Table 13: Seasonal Kendall-Tau Results for - Turbidity

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Lab	No significant trend	2745	31	1995 - 2025	1.8	-0.05624	2.04962	-0.01111	0.0955

Turbidity showed no detectable trend between 1995 and 2025.

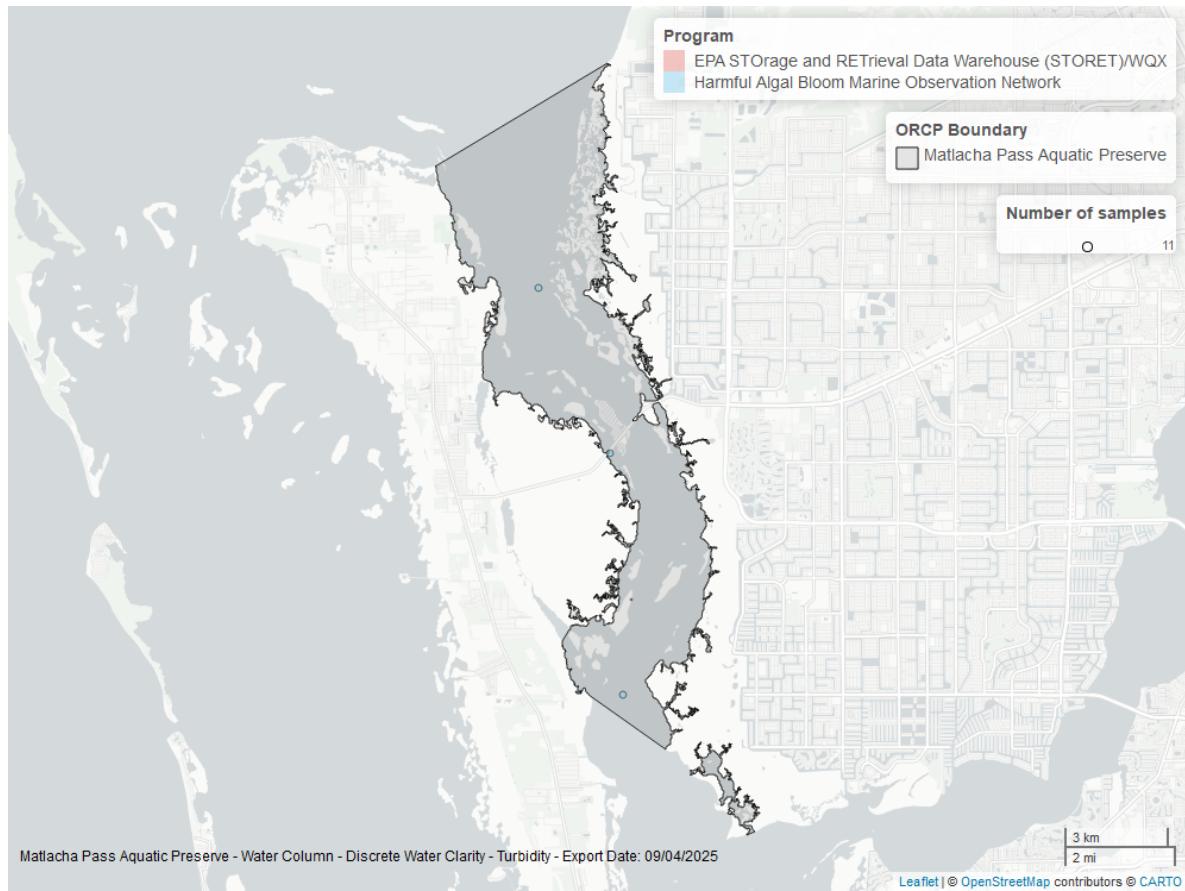

Figure 26: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Turbidity - Continuous

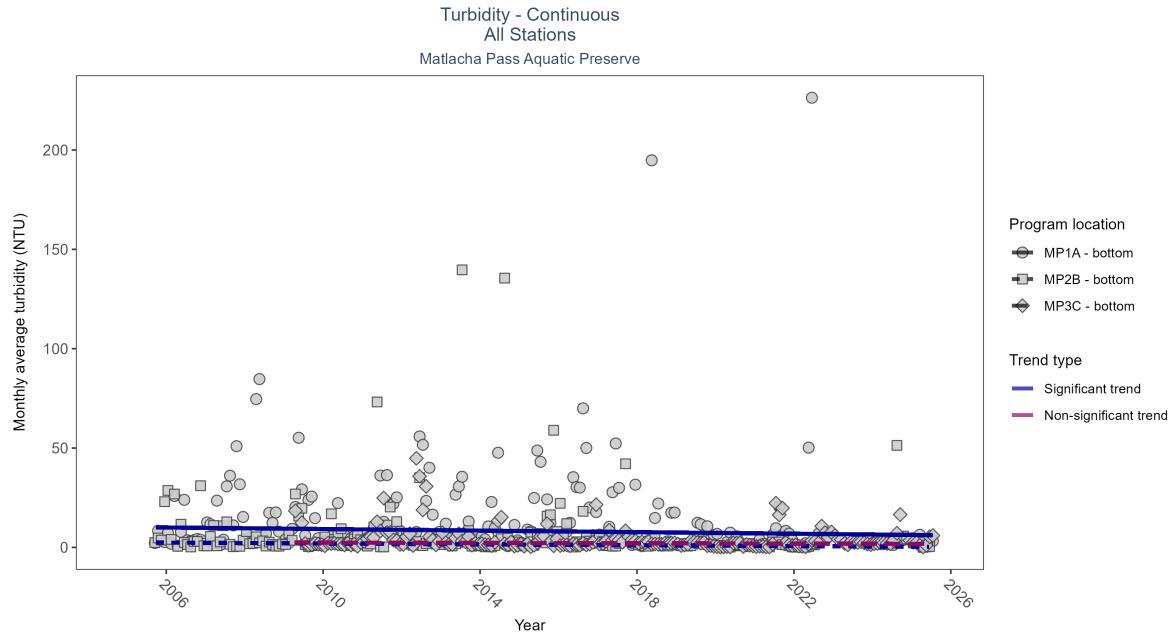

Figure 27: Scatter plot of monthly average turbidity over time at continuously monitored program locations. Each location is analyzed separately, with significant (blue) or non-significant (magenta) trend lines shown for time series that included five or more years of observations.

Table 14: Seasonal Kendall-Tau Results - Turbidity

Program Location	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
MP1A	Significantly decreasing trend	470354	20	2005 - 2025		2	-0.18	10.22	-0.20 3e-04
MP2B	Significantly decreasing trend	524449	20	2005 - 2025		1	-0.19	2.50	-0.11 1e-04
MP3C	No significant trend	462236	17	2009 - 2025		2	-0.08	2.44	-0.04 0.1389

At two program locations, monthly average turbidity decreased by 0.11 NTU per year at one site and by 0.2 NTU per year at the other. No detectable change in monthly average turbidity was observed at one location.

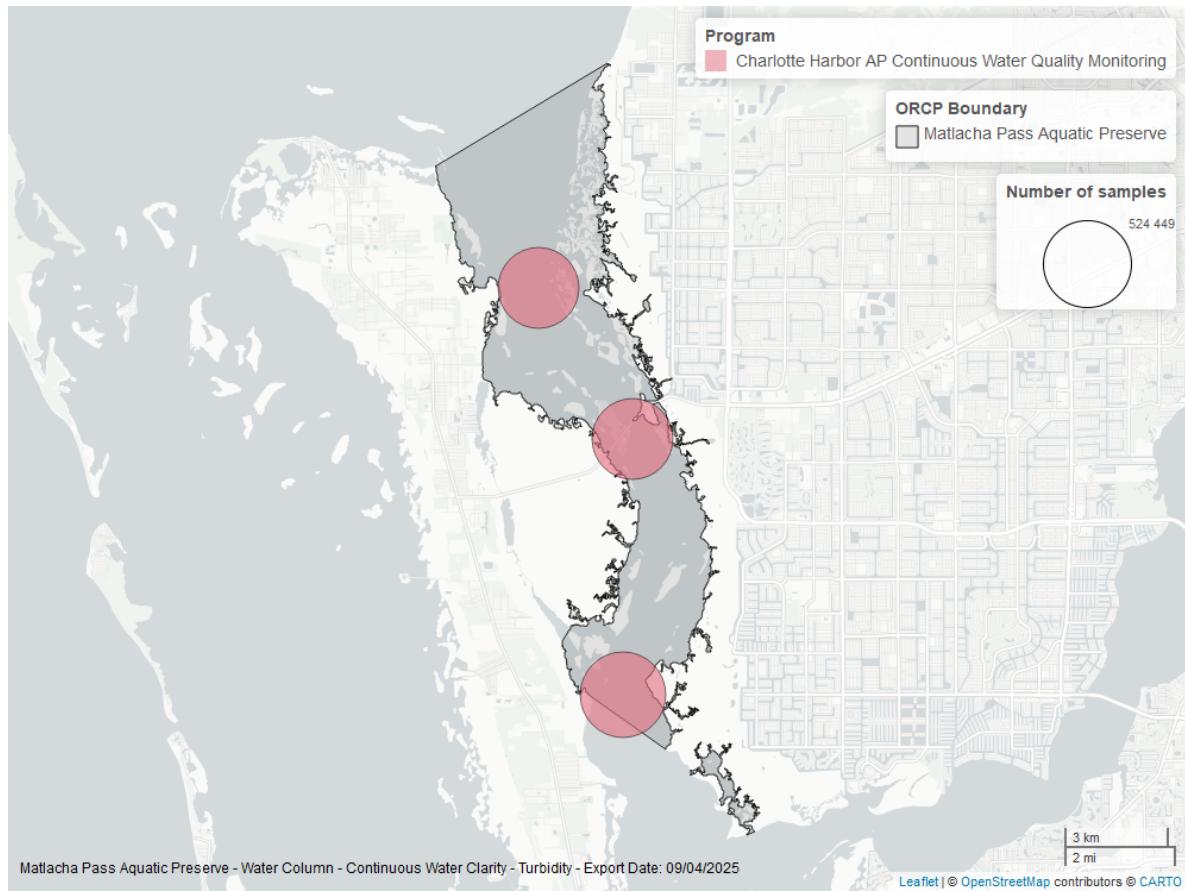

Figure 28: Map showing location of turbidity continuous water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Total Suspended Solids - Discrete

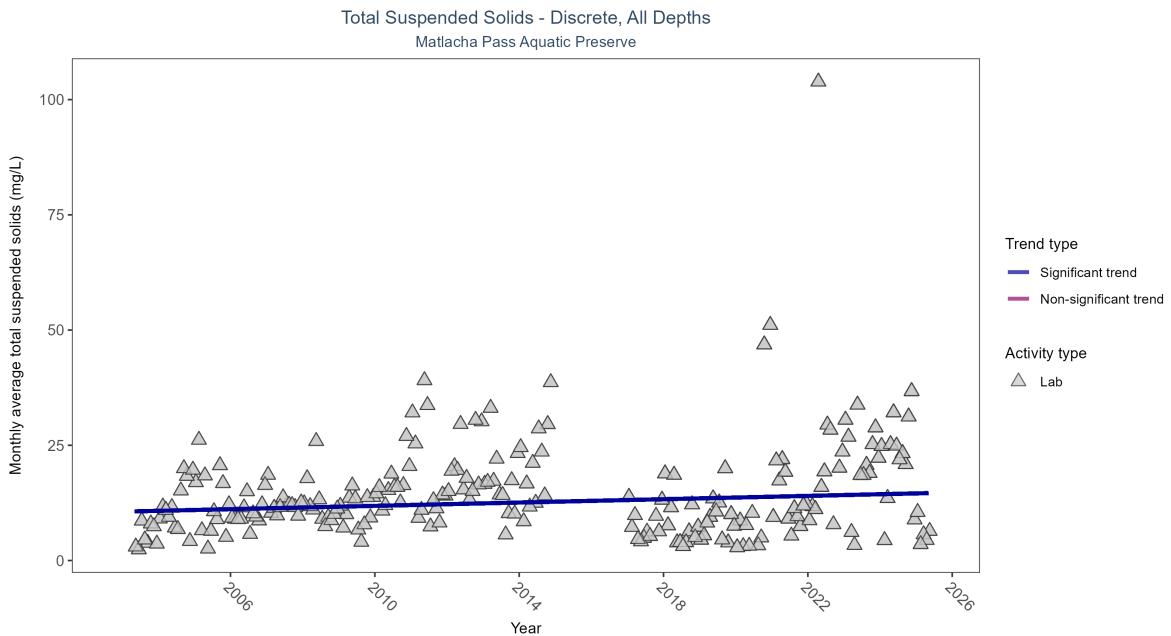

Figure 29: Scatter plot of monthly average total suspended solids (TSS) over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only TSS values obtained from laboratory analyses (triangles) are included in the plot.

Table 15: Seasonal Kendall-Tau Results for - Total Suspended Solids

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Lab	Significantly increasing trend	1105	21	2003 - 2025	10.4	0.1101	10.59843	0.18	0.0225

Monthly average total suspended solids increased by 0.18 mg/L per year, indicating a decrease in water clarity.

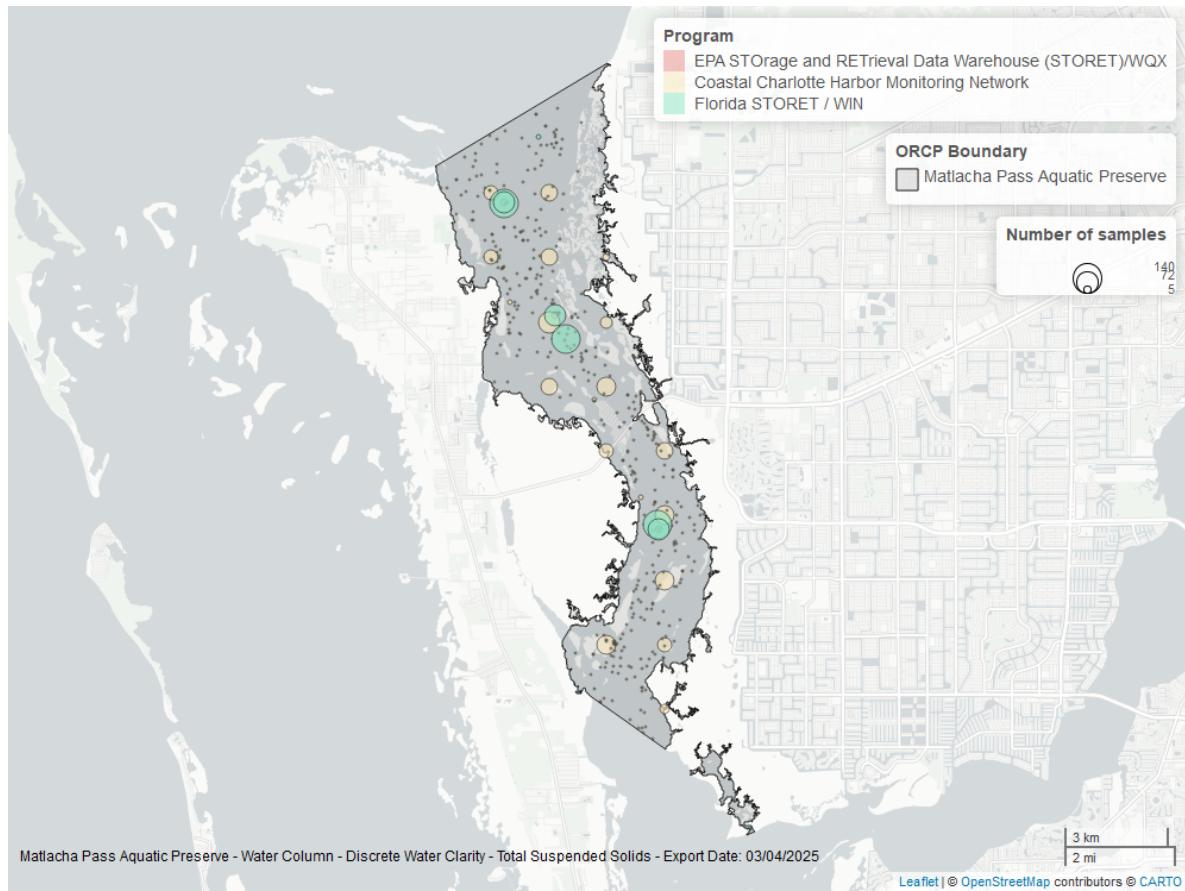

Figure 30: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Chlorophyll a, Uncorrected for Pheophytin - Discrete

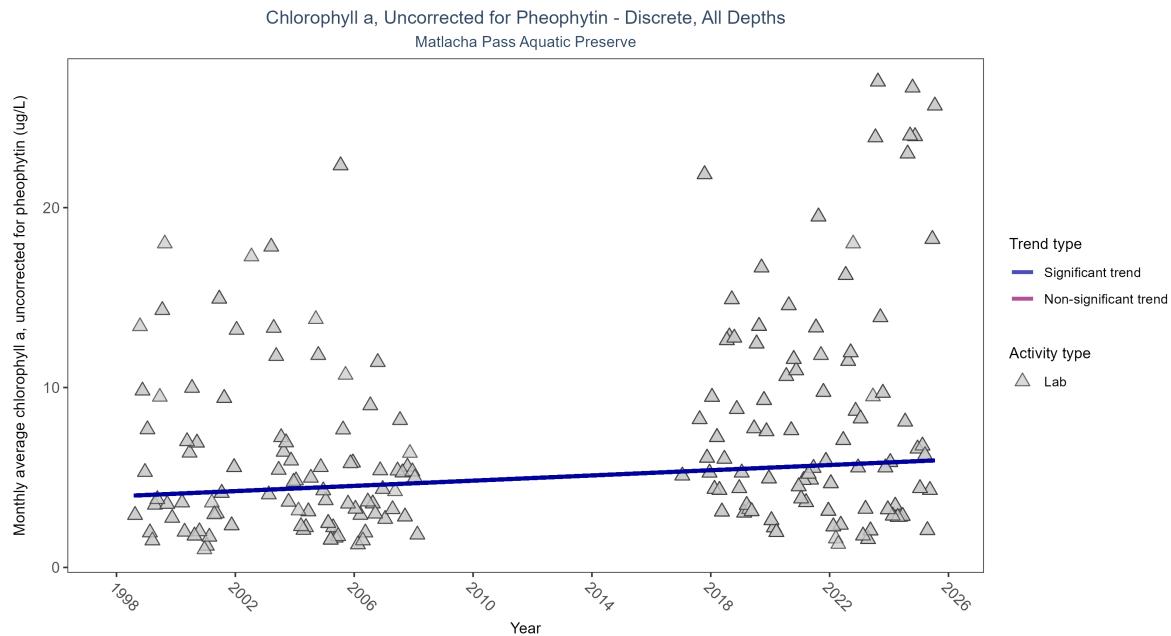

Figure 31: Scatter plot of monthly average levels of chlorophyll a, uncorrected for pheophytin, over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only laboratory-analyzed chlorophyll a (triangles) is included in the plot.

Table 16: Seasonal Kendall-Tau Results for - Chlorophyll a, Uncorrected for Pheophytin

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Lab	Significantly increasing trend	558	20	1998 - 2025	4.8	0.18786	3.95271	0.0725	6e-04

Monthly average chlorophyll a, uncorrected for pheophytin, increased by 0.07 $\mu\text{g/L}$ per year, indicating a decrease in water clarity.

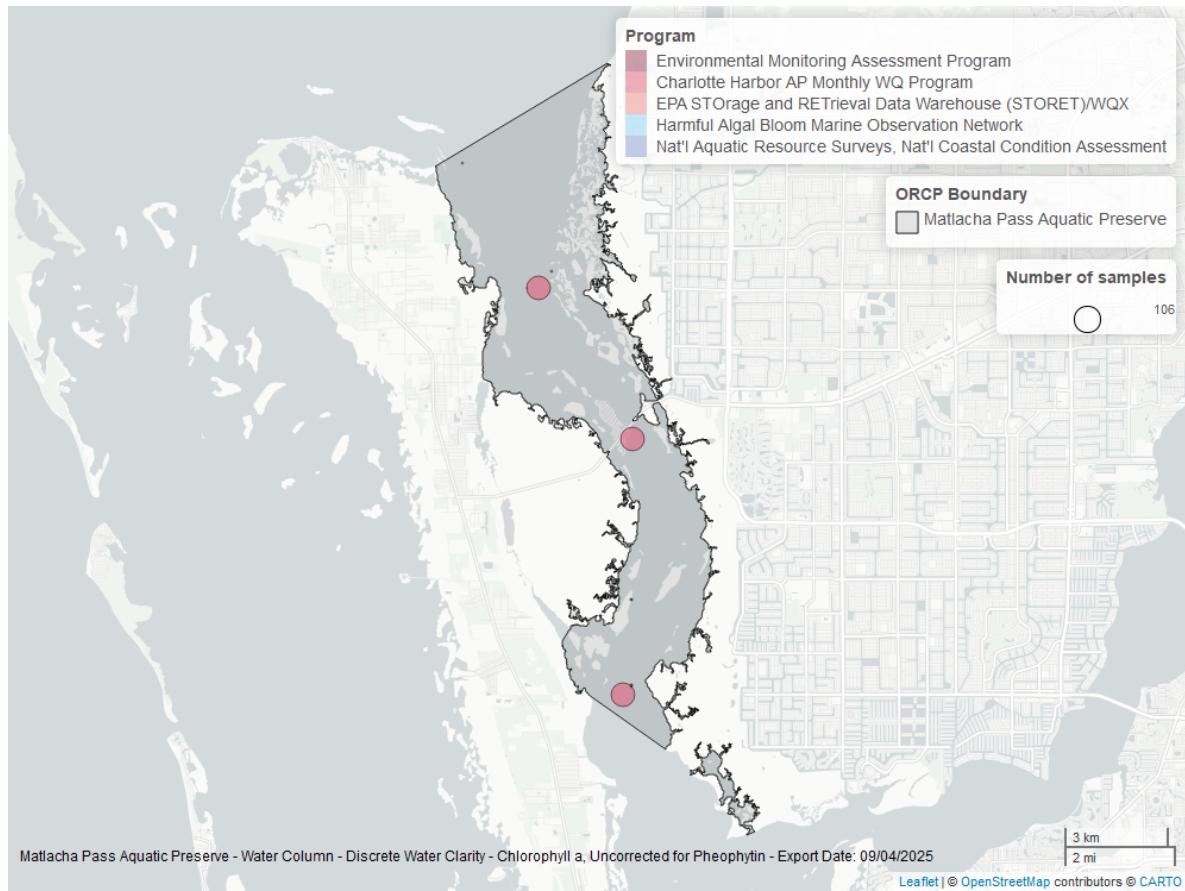

Figure 32: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Chlorophyll a, Corrected for Pheophytin - Discrete

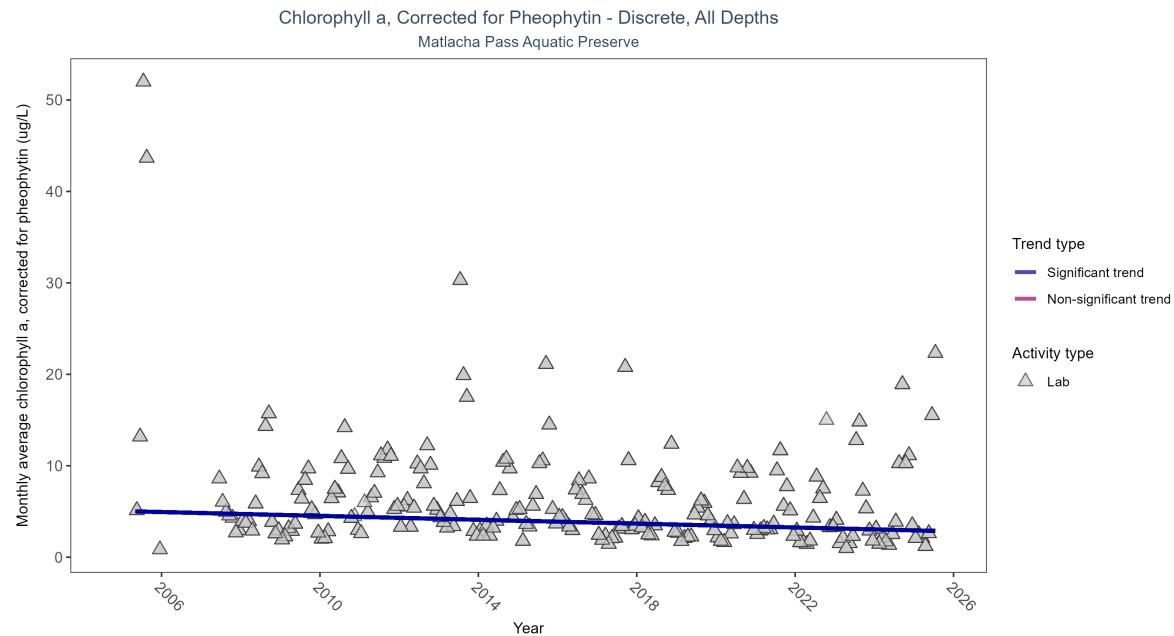

Figure 33: Scatter plot of monthly average levels of chlorophyll a, corrected for pheophytin, over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only laboratory-analyzed chlorophyll a (triangles) is included in the plot.

Table 17: Seasonal Kendall-Tau Results for - Chlorophyll a, Corrected for Pheophytin

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Lab	Significantly decreasing trend	1403	20	2005 - 2025	3.3	-0.1916	5.0449	-0.10538	1e-04

Monthly average chlorophyll a, corrected for pheophytin, decreased by $0.11 \mu\text{g/L}$ per year, indicating an increase in water clarity.

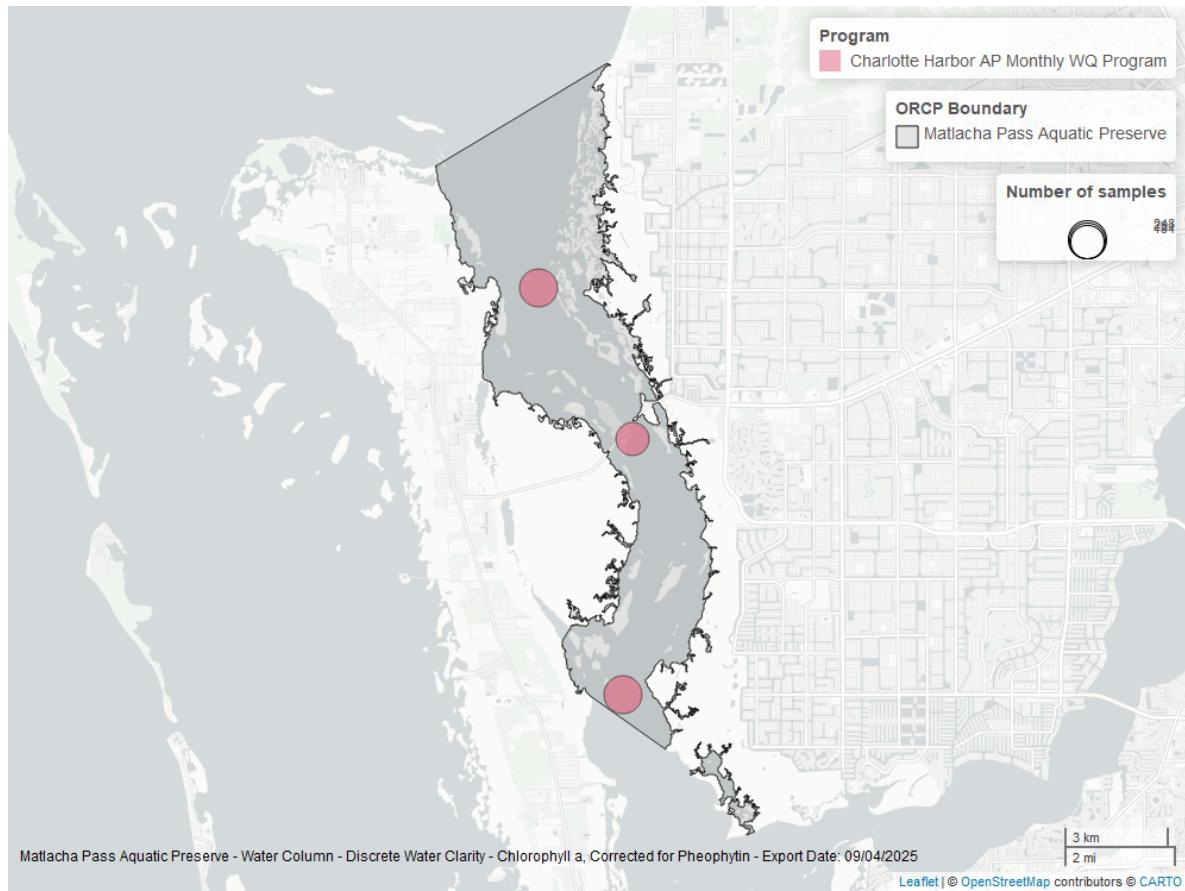

Figure 34: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Secchi Depth - Discrete

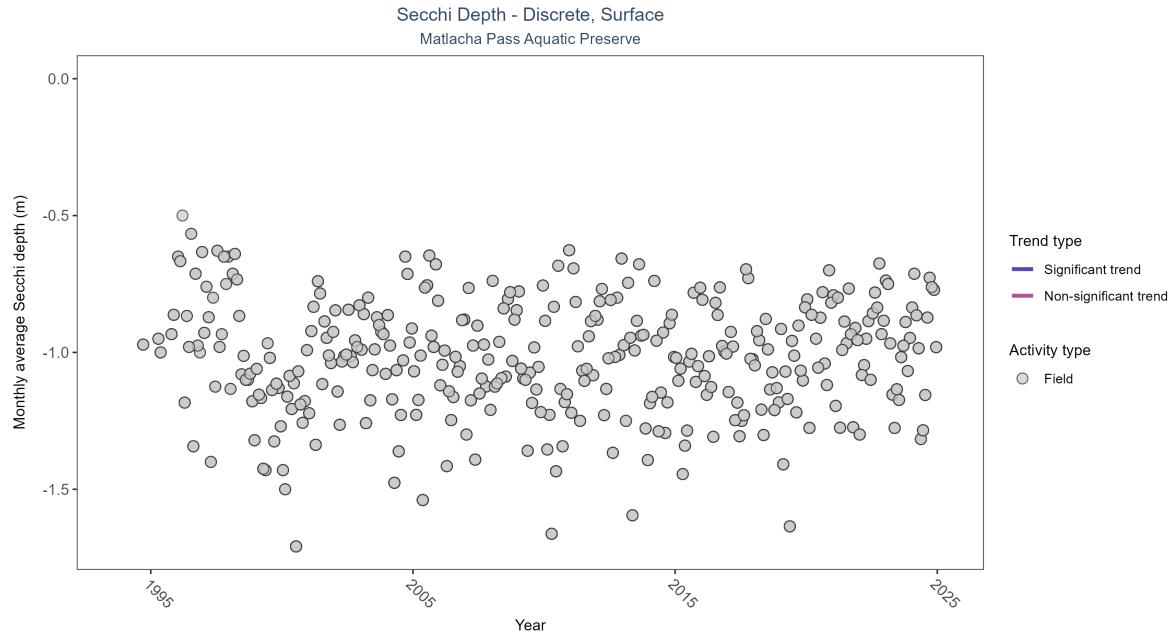

Figure 35: Scatter plot of monthly average Secchi depth over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Secchi depth is only measured in the field (circles).

Table 18: Seasonal Kendall-Tau Results for - Secchi Depth

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Field	No significant trend	6608	32	1994 - 2025	-0.9	-0.0299	-1.1055	-0.00139	0.4111

Secchi depth showed no detectable trend between 1994 and 2025.

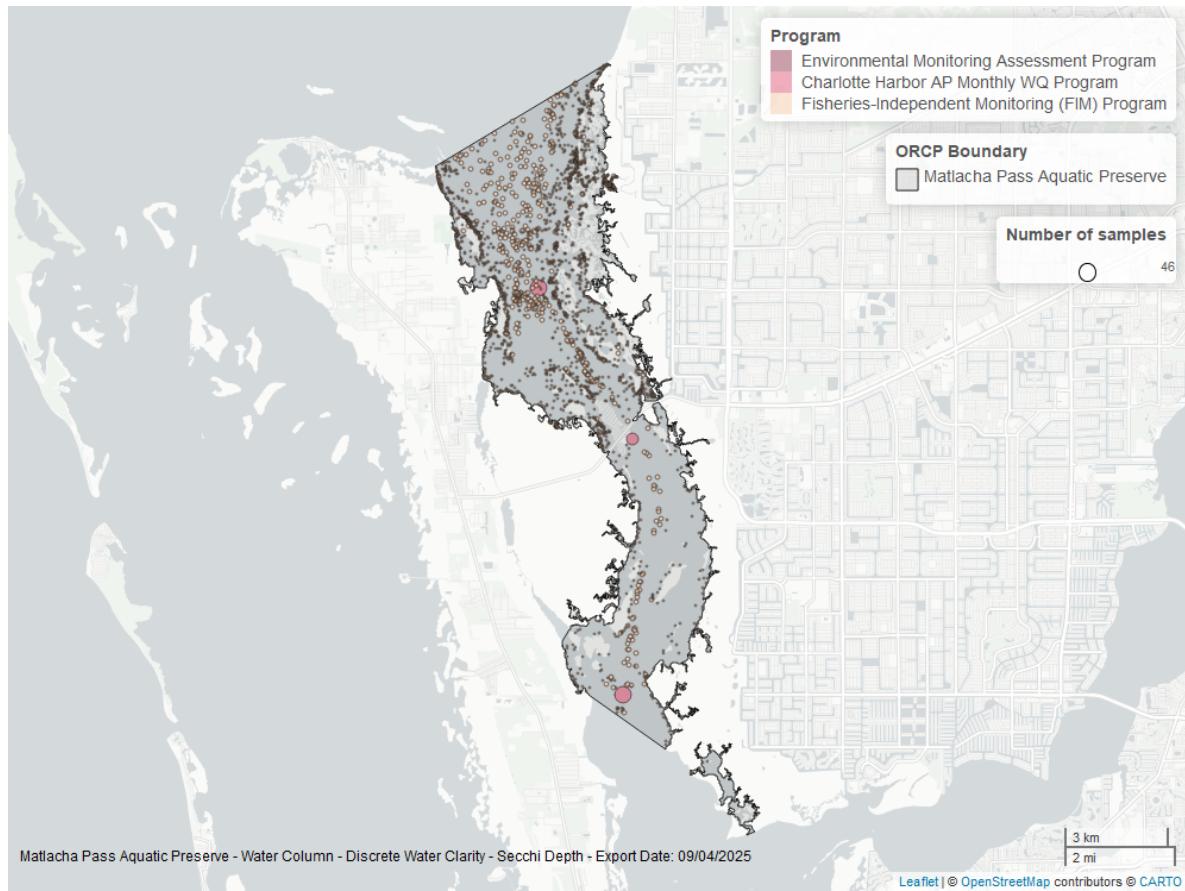

Figure 36: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.

Colored Dissolved Organic Matter - Discrete

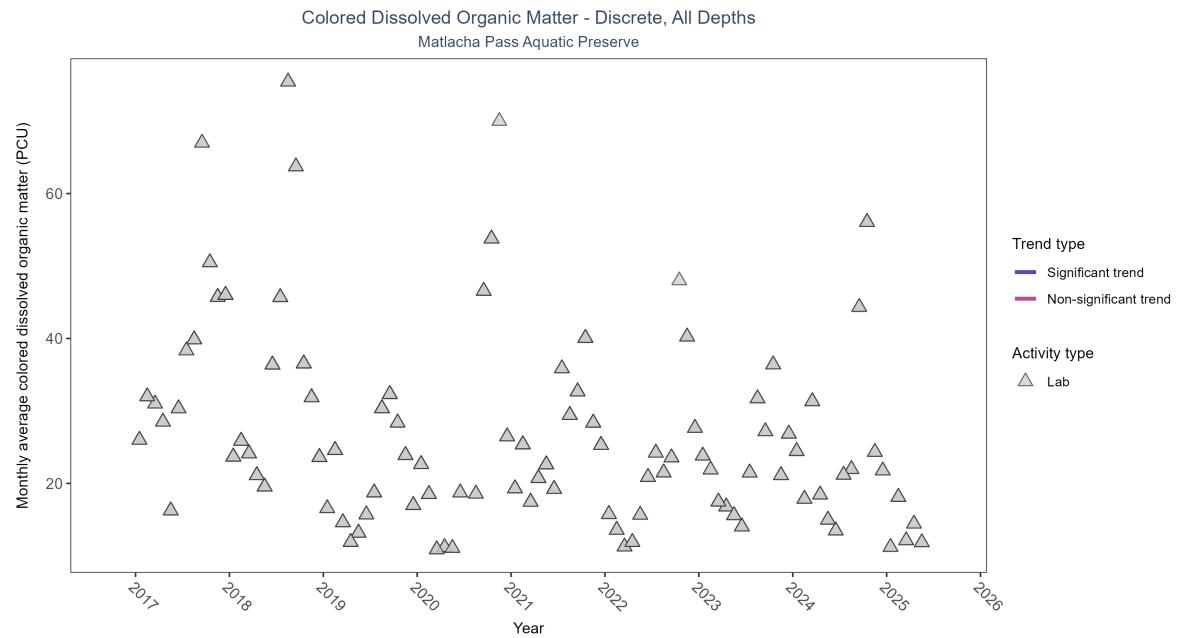

Figure 37: Scatter plot of monthly average colored dissolved organic matter (CDOM) over time. If the time series included ten or more years of discrete observations, a significant (blue) or non-significant (magenta) trend line is also shown. Only laboratory-analyzed CDOM (triangles) is included in the plot.

Table 19: Seasonal Kendall-Tau Results for - Colored Dissolved Organic Matter

Activity Type	Statistical Trend	Sample Count	Years with Data	Period of Record	Median Result Value	Tau	Sen Intercept	Sen Slope	P
Lab	Insufficient data to calculate trend	526	9	2017 - 2025	24.65	-	-	-	-

There was insufficient data to fit a model for colored dissolved organic matter.

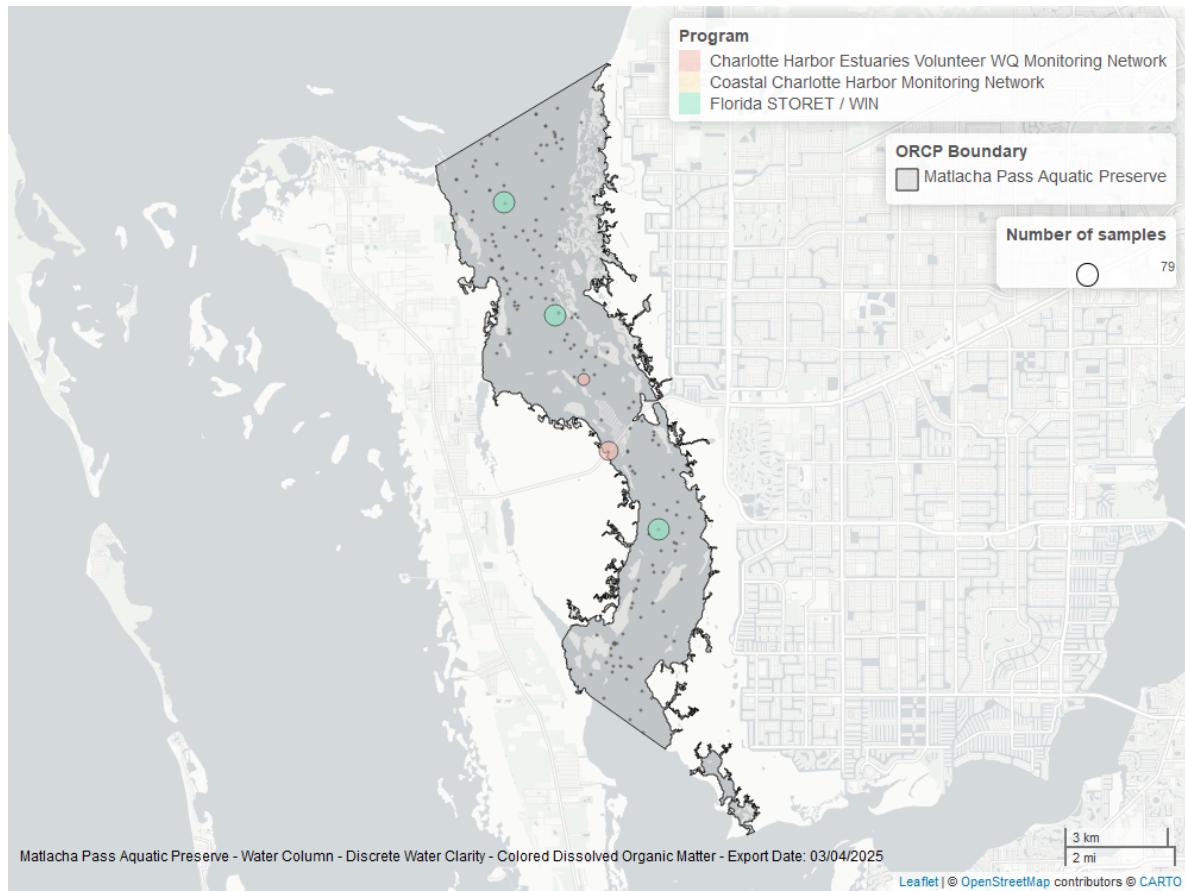

Figure 38: Map showing location of discrete water quality sampling locations within the boundaries of *Matlacha Pass Aquatic Preserve*. The bubble size on the maps above reflect the amount of data available at each sampling site.
